

Contents

Keynote Speech: Czech Space Activities and Organisations

Petr Bareš,

SESSION 1A

On-Board Software Development Environments with Automated Code Generation

Chair: F. Hass

Applying CASE Tools for On-Board Software Development

U. Brammer, A. Höhle

Generative Programming for Space Applications

V. Cechticky, A. Pasetti

SESSION 1B

Satellite Simulation Environments

Chair: F. De Bruin

EuroSim Simulation Framework

R. De Vries

Reusable Infrastructure Elements for Spacecraft Simulators

T. Bru

The Herschel-Planck ACMS Simulation Approach

M. Neefs, M. Haye

SESSION 2A
On-Board Software Prototyping, Modelling and Simulated Execution
Chair: P. Coppola

SDL Model and Simulation Applied to EUROSTAR 3000 On Board SW
D. Breton

Iterative Development and Prototyping – Experiences From Development Of GPS Signal Processing Applications
U. Ivraeus

Modelling of Complex System Behaviour: Application to ATV Mission and Vehicle Management Design and Functional Validation
P. Ranoarivony, F. Maron

SESSION 2B
Earth Observation
Chair: F. Hass

Earth Observation and GIS Services Integration Approach in MASS
Y. Coene, S. Gianfranceschi, P. Marchetti

Grid Technology and Neural Networks for the Analysis of Atmospheric Ozone from Satellite Data
S. Casadio, F. Del Frate, S. Godin-Beekmann, M. Petitdidier

Management of “Future Products” in the Distributed Payload Ground Segment for TerraSAR-X
E. Mikusch, M. Wolfmüller, E. Diedrich, D. Dietrich, M. Böttcher

SESSION 3A
On-Board Software Validation Facilities & Software Development Environments
Chair: M. Fauveau

SIMSTB: A Full Software Facility for On-Board Software Development on ERC32 Target
F. Pasquier, J.-M. Fournie

High Performances Space Processors Simulators Based on Virtualisation Technologies
G. Garcia

Open Test Environment for Architecture Based on LEON
Y. Dufrenne

Overclocking of the TSC695: Where No One Has Gone Before
– a Small Issue for Users, a Major Item for Engineers
J. van der Wateren, C. van Teylingen, R. Leenheer

SESSION 3B
Guidance And Navigation
Chair: W. Busch

Entry, Descent and Landing Systems: "The Next Generation"

H. Winkelman, J. Gebbie, M. Symonds, G. Ortega

On the Design of an Optimal GNC Sensor Architecture for Autonomous Planetary Landers

V. Silva, S. Parkes

LIDAR-Based GNC for Planetary Landing: Simulation with PANGU

S. Parkes, M. Dunstan, D. Matthews, I. Martin, V. Silva

SESSION 4A
Hardware Development
Chair: P. Plancke

Improving the ASIC and FPGA Development Process

P. Cormery

SESSION 4B
Software Test and Validation Management
Chair: B. Mullet

CVT (Customisation Verification Tool)

L. Gourdon

Standard Test Equipment Approach for Space Electronics Verification

S. Pachschoell

ELOG Operational Logs and Knowledge Base Engine Effectiveness and Added Value of Systematic Operational Logging During Development and Integration of Complex Data Ground System

G. Di Girolamo

SESSION 5A
On-Board Data Handling Hardware and Systems
Chair: H.V. Heyer

MCM SPARC ERC32SC Development and Validation Results

N. Béhot, C. Boléat, C. Champetier, J.-F. Coldefy, M. Souyri

Development and Test Results of a System on a Chip for a data Handling System

C. Boléat, J-F Coldefy, M. Lefebvre, M. Souryi, R. Weigand

Customisable-Off-The-Shelf Digital Signal Processing Board for Space Applications

H. Reichinger, M. Süst

Architecture of Next Generation Highly Integrated Data Handling Systems

T. Hult

SESSION 5B
Requirements Engineering and Validation Processes
Chair: G. Montalto

Engineering Reliable Systems, Components, and Objects

P. Carpenter

Please Give Me a Pound of System Test and Two Miles of Performance!

O. Denoo

Risky Business: Get a Grip On It

P. Cober

MaTeLo: Automated Testing Suite for Software Validation

A. Guiotto, B. Acquaroli, A. Martelli

SESSION 6A
On-Board Hardware: COTS Based Data Handling Systems
Chair: L. Maltecca

Application of the Payload Data Processing and Storage System to

MOSREM – Multi-Processor On-Board System for Robotic Exploration Missions

D. Jameux

Cost-Efficient COTS Approach for Robotic Components Verification on ISS (ROKVISS)

K.-P. Förster, E. Lvov, W. Naumann

SESSION 6B
On-Board Components
Chair: J.F. Coldefy

Solid State Mass Memory with Integrated File Handling System for Mars Express and Venus Express

J. Mueller

A Flexible Integrated Solution for On-Board Radar Transmit Pulse Generation

U. Hahn, C. Mavrocordatos

High Speed CCSDS Data Formatter

U. Lonsdorfer, F. Rombeck

The Digital Electronic Subsystem of Marsis

L. Maltecca, M. Pecora, L. Scandelli

SESSION 7A
Future Architectures and Approaches to On-Board Data Handling (1)
Chair: M. Richard-Foy

XPP – A High Performance Parallel Signal Processing Platform for Space Applications

E. Schueler, M. Syed, T. Helfers

Plug & Play Architecture for On-Board Software Components

C. Moreno, G. Garcia

Next Generation Avionics System for Satellite Application

M. Wiegand, G. Schmidt, M. Hahn

SESSION 7B
Orbit Determination and Satellite Acquisition
Chair: D. Séguéla

Interferometer for High Precision Orbit Determination

F. Pedersen

Autonomous Satellite Acquisition by Ground Station

J. Foliard, H. Madieu, A. Comps, S. Burgaud, M. Vincent

SESSION 8A
Future Architectures and Approaches to On-Board Data Handling (2)
Chair: C. Joergensen

Software Agents Applications Using Real-Time CORBA
S. Fowell, R. Ward, M. Nielsen

Event-Driven On-Board Software Using Priority-Based Communications Protocols
S. Fowell, R. Ward, C. Plummer

A Standard Java Virtual Machine for Real-Time Embedded Systems
F. De Bruin, F. Deladerrière, F. Siebert

SESSION 8B
Signal Processing, Image Handling
Chair: A. Christen

Space Application of Wavelet-Based Image Analysis
A. Henrichs

Digital Video System for Space Applications
D. Titomanlio, G. Capuano, M. Severi, R. Quadarella

SESSION 9A
Adaptation and Reuse of On-Board Software Systems and Approaches
Chair: A. Martelli

An Adaptable On-Board Application In C++
G. Montalto, A. Pasetti, N. Salerno

AstroBus On-Board Software
D. Biscarros, C. Cantenot, J. Séronie-Vivien, G. Schmidt

SESSION 9B
Harness Reduction Techniques
Chair: S. Parkes

The Spacecraft Sensor Bus as a Means of Harness Reduction
C. Plummer, P. Plancke

Power Line Carrier Techniques Applied to Spacecraft Data Handling
J.-Y. Bedu, J. Morisse, X. Auvergne, P. Plancke

Wireless Infra-Red Links for Intra-Satellite Communications
A. Santamaría, F. López-Hernández, H. Guerrero, I. Arruego, S. Rodríguez

Flight Demonstration of a Fault-Tolerant Onboard Network
L. Lamorie, E. Edwards, M. Hubert, F. Ricci, D. Lorenzini, L. Hartman

SESSION 10A
On-Board COTS Software
Chair: R. Szczepaniak

A Selection Methodology for the RTOS Market
P. Melanson, S. Tafazoli

SESSION 10B
CAN and Spacewire
Chair: A. Christen

CAN Bus as a Spacecraft Onboard Bus
C. Plummer, P. Roos, L. Stagnaro

A Comparison of CAN and Bluetooth Protocols – A Study for Application of CAN Over Bluetooth for Wireless On-Board Data Handling for a Spacecraft Sensor Network
R. Magness

TCP/IP Over SpaceWire
S. Mills, S. Parkes

SpaceWire: IP, Components, Development Support and Test Equipment
S. Parkes, C. McClements, S. Mills, I. Martin

SESSION 11A
Data Handling Technology Harmonisation and Policies
Chair: F. De Bruin

European Space Technology Harmonisation On Board Computer & Data Systems
P. Plancke, P. David

Status of Space Software's Compiler and Kernel Activities and the ESA Policy
M. Nielsen

Benefits and Misunderstandings of Free Software in the European Space Industry
C. Comar, F. Gasperoni, R. Dewar

SESSION 11B
Demodulators/Decoders/High Speed Signal Processing
Chair: J.P. Calzolari

8PSK Demodulator for New Generation DVB-S2
T. Botticchio, P. Burzigotti, R. De Gaudenzi, M. Luise, A. Martinez, F. Richichi, P. Tabacco

A Turbo Co/Decoder Implementation for Next Generation DVB-S2
S. Benedetto, T. Botticchio, P. Burzigotti, R. De Gaudenzi, A. Martiniez, G. Montorsi, F. Richichi, P. Tabacco

A DVB-RCS Multi-Channel, Multi-Frequency Demodulator Based on a Multi-Tasking Hardware-Software Architecture Using a System on Programmable Chip Technology
A. Van Doninck, M. Dendoncker, F. Adriaensen, P. Delbeke, A. Rolle, T. Craey, S. Krekels

SESSION 12A
Software Safety and Dependability Assessment Methods and Techniques
Chair: M. Hernek

Hardware Software Interaction Analysis: Practical Case and Lessons Learnt
J. Blanquart

ECSS-Q-80-03: Guidelines for Software Dependability and Safety Methods and Techniques
P. Rodríguez-Dapena

Static and Dynamic Verification of Critical Software for Space Applications
F. Moreira, R. Maia, D. Costa, N. Duro, P. Rodríguez-Dapena, K. Hjortnaes

Software Dependability and Safety Evaluations ESA's Initiative
M. Hernek

SESSION 12B
Mission Data Construction and Decommutation
Chair: M. Renard

Generation of ICD Using CCSDS and ISO Standards

F. Schiavon, B. Larzul

Make Your Data Life Cycle Easier with DEBAT – Development of EAST Based Access Tools

A. Ciarlo, C. Guerreiro, D. Minguillon

A Telemetry Browser Built with Java Components

E. Poupart

The Future of ESA's Telemetry and Telecommand System: Implementation of a Service Provider for CCSDS SLE Services

G. Calzolari, M. di Giulio, Y. Doat

SESSION 13A
Dependability, Safety and Fault Tolerance Design
Chair: P. Lacan

Software Product Assurance for Autonomy On-Board Spacecraft

J.-P. Blanquart, S. Fleury, M. Hernek, C. Honvault, F. Ingrand, J.-C. Poncet, D. Powell, N. Strady-Lécubin, P. Thévenod

Designing for Failure

P. Beerthuizen

SMART-FDIR: Use of Artificial Intelligence in the Implementation of a Satellite FDIR

A. Guiotto, A. Martelli, C. Paccagnini

Embedded Computer System on the Rosetta Spacecraft

A. Baksa, A. Balázs, Z. Pálos, S. Szalai, L. Várhalmi

SESSION 13B
Mission Control and Monitoring and Control
Chair: M. Symonds

Advanced Monitoring, Control and Operations Concepts of the Galileo Satellite Constellation

R. Kay, P. Norris, P. Davies

SCOS-2000: Evaluating a Generic Mission Control System According To SPEC

M. Jones, E. Gomez, F. Aldea, H. Schäbe

A Framework for Monitoring, Control and Configuration

H. Wulf

SESSION 14A
Fault Tolerance with COTS
Chair: W. Busch

Fault Tolerance and COTS: Next Generation of High Performance Satellite Computers
P. Behr, W. Bärwald, K. Brieß, S. Montenegro

A New Approach to Provide Reliable Data Systems Without Using Space-Qualified
Electronic Components
W. Häbel

SESSION 14B
Mission Databases and Monitoring and Control
Chair: M. Renard

ESA's Strategy for Software Reuse in Manned Space Ground System Infrastructure
W. van Leeuwen

Monitoring and Control of the Automated Transfer Vehicle
C. Hugonnet, S. D'Hoine

BDC: Operational Database Management for the SPOT/HELIOS Operations Control System
P. Guiral, S. Teodomante

SESSION 15A
Hard Real Time and Safety Critical Design and Implementation
Chair: D. Séguéla

CPFPS: Development of a Safety Critical Hard Real Time Distributed Application for EGNOS
J. Campos, E. Mora, N. Zarraoa

Events Controlled Execution Model for On-Board System with Severe Real-Time Constraints
F. Bossard

MICROSEK: A Certifiable Hard Real-Time Operating System for Safety Critical Applications
A. Brachini, P. Coppola, W. Piperno, E. Russo

SESSION 15B
Operational Control Procedures and Plans
Chair: B. Mullet

Process for the Definition and Validation of Flight Control Procedures
J-C. Lloret

Operational Concepts for the ATV Project and Applications with MOIS Tool
J. Camel, S. Vial

SESSION 16A
Software Design Methods
Chair: G. Estaves

HOOD and AADL
P. Dissaux

Application of Object Oriented Methods to Data Handling Engineering
K. Jaloustre-Audouin, J. Morisse, Y. Bordes

UML Model Based Development Process for the SIRAL Digital Processing Unit Software
G. Estaves, F. Ruiz

A Case Study for HRT-UML
M. D'Alessandro, S. Mazzini, F. Donati

SESSION 16B
Mission Operational Interfaces
Chair: F. Hass

Unified Synoptic System
D. Nicklaussen

Request Interface for Operations: A Web Service and Workflow Prototype
F. Jocteur Monrozier, T. Pesquet

PANEL SESSION:
Fault Tolerance Versus Fault Avoidance
