

Proceedings of the

9th International Symposium
on

Materials in a Space Environment

16 - 20 June 2003
Noordwijk, The Netherlands

European Space Agency
Agence spatiale européenne

International Programme Committee

Barrie Dunn	ESA/ESTEC (Chair)
Magdeleine Dinguirard	ONERA/DESP (Vice Chair)
Eric Werling	CNES (Vice Chair)
Johann Antonenko	Astrium Germany
Bruce Banks	NASA/GSFC
M Ralph Carruth	NASA/MSFC
Alan Chambers	University of Southampton
Christian Durin	CNES
Marc van Eesbeek	ESA/ESTEC
Eitan Grossman	SOREQ
Vincenzo Iannucci	Alenia Aerospazio
Jacob Kleiman	ITL
Darius Nikanpour	CSA
Alberto Passerone	IENI-CNR
Christopher Semprimoschnig	ESA/ESTEC
Vladimir Skurat	Russian Academy of Sciences
Masahito Tagawa	Kobe University

Organising Committee

Marc van Eesbeek	ESA/ESTEC (Chair)
Magdeleine Dinguirard	ONERA
Karen Fletcher	ESA Proceedings Editor
Margarete Holzer	ESA/ESTEC
Jacob Kleiman	ITL
Christopher Semprimoschnig	ESA/ESTEC
Yolanda Spaans	ESTEC Conference Bureau
Eric Werling	CNES

Publication: Proceedings of 'Materials in a Space Environment'
Noordwijk, The Netherlands (ESA SP-540, September 2003)

CONTENTS

Introduction

Welcome address

Dunn, B; Chairperson Programme Committee

Summary of the oral presentations

Van Eesbeek, M; Chairperson Organising Committee

Session 1

Opening

Chair: Dunn, B; Nikanpour, D

Electrostatic behaviour of materials in a charging space environment <i>Payan, D</i>	3
Space and atmospheric environments: from low earth orbits to deep space <i>Barth, J</i>	17
The selection and use of new materials in support of future ESA space science missions <i>Paulsen, T</i>	31

Session 2: New Materials

Chair: Antonenko, J; Kleiman, J

Smart radiation device based on a perovskite manganese oxide <i>Tachikawa, S; Shimazaki, K; Ohnishi, A; Hirose, H; Shimakawa, Y; Ochi, A; Okamoto, A; Nakamura, Y</i>	41
Development of solar reflector for geostationary spacecraft <i>Hidden, G; Martinez Vega, J; Remaury, S; Nabarra, P</i>	49
Some preliminary evaluations of black coating on aluminium AA2219 alloy produced by plasma electrolytic oxidation (PEO) process for space applications <i>Shrestha, S; Merstallinger, A; Sickert, D; Dunn, BD</i>	57
Sol-gel derived C-SiC composites and protective coatings for sustained durability in the space environment <i>Haruvy, Y; Liedtke, V</i>	67
Polymerization processes in simulated free space conditions <i>Kondyurin, A; Lauke, B</i>	75

Development of carbon-carbon sandwich panels 81
Panin, F; Lutz-Nivet, M; Lemaire, H

The effect of simulated space thermal environment on damping capacity of metal matrix composites 87
Jiang, X; Ouellet, L; Nikanpour, D; Lo, J

Session 3: Atomic Oxygen

Chair: Banks, B; Grossman, J

Enhancement of surface durability of space materials and structures in LEO environment 95
Gudimenko, Y; Ng, R; Kleiman, J; Iskanderova, Z; Tennyson, RC; Hughes, PC; Milligan, D; Grigorevskiy, A; Shuiskiy, M; Kiseleva, L; Edwards, D; Finckenor, M

Nucleation and growth of nanoscale to microscale cylindrical pits in highly-ordered pyrolytic graphite upon hyperthermal atomic oxygen exposure 107
Nicholson, K; Minton, T; Sibener, SJ

Synthesis and atomic oxygen erosion testing of space-survivable POSS (polyhedral oligomeric silsesquioxane) polyimides 113
Gonzalez, R; Tomczak, S; Minton, T; Brunsvold, A; Hoflund, G

A QM/MM model for hyperthermal O(³P) collisions with hydrocarbon self-assembled monolayers 121
Troya, D; Schatz, G

Model atomic oxygen reactions: detailed experimental and theoretical studies of the reactions of ground-state O(³P) with H₂, CH₄, CH₃CH₃, and CH₃CH₂CH₃ at hyperthermal collision energies 129
Minton, T; Garton, D; Troya, D; Maiti, B; Pascual, R; Schatz, G

The development of carbon-based sensors for the measurement of atomic oxygen 137
White, C; Rao, J; Roberts, G; Chambers, A; Lawson, KJ; Nicholls, JR

Scattered atomic oxygen effects on spacecraft materials 145
Banks, B; Miller, S; de Groh, K; Demko, R

An investigation of the resistance of POSS polyimide to atomic oxygen attack 153
Brunsvold, A; Minton, TK; Gouzman, I; Grossman, E; Gonzalez, RI

Session 4: Materials for Inner Planetary Environments

Chair: Passerone, A; Werling, E

Space environmental testing of thermal control foils at extreme temperatures <i>Semprimoschnig, C; Heltzel, S; Polsak, A; Van Eesbeek, M</i>	161
Thermal control materials in Mercury environment <i>Antonenko, J</i>	169
A detailed study on the thermal endurance of Kapton HN TM and Upilex S TM <i>Heltzel, S; Semprimoschnig, C</i>	179

Session 5: Contamination (part 1)

Chair: Novikov, L; Scialdone, J

Understanding and control of external contamination on the International Space Station <i>Soares, C; Mikatarian, R</i>	189
The gaseous and particle environment observed above the MSX spacecraft after seven years on orbit <i>Uy, OM; Green, B; Wood, BE; Galica, G; Boies, M; Lesho, J; Cain, R; Hall, DF</i>	197
Pressure and purging effects on material outgassing and evaporation <i>Scialdone, J</i>	203

Session 6: Contamination (part 2)

Chair: Van Eesbeek, M; Soares, C

Re-evaporation of polymeric materials during outgassing experiments <i>Lesvenan, AL; Guyt, J; Schmeitzky, O; Van Eesbeek, M</i>	211
VUV radiation interaction with outgassing products of black paints: <i>in-situ</i> NUV-VIS spectroscopy and complementary studies <i>Levy, N; Grossman, E; Gouzman, I; Noter, Y</i>	217
Thruster plume induced contamination measurements from the PIC and SPIXEF flight experiments <i>Soares, C; Barsamian, H; Rauer, S</i>	225
Study of the UV-enhancement of contamination <i>Pereira, A; Roussel, JF; van Eesbeek, M; Guyt, J; Schmeitzky, O; Faye, D</i>	231
Outgassing of ISS payload pointing devices <i>Lobascio, C; Rampini, R</i>	239

- Use of quartz crystal microbalance on the polymer degradation studies regarding atomic oxygen activities in low earth orbit 247
Tagawa, M; Yokota, K; Kinoshita, H; Ohmae, N

Session 7: Synergistics Effects

Chair: Dever, J; Tahawa, M

- On the degradation of polymeric thin films in LEO space environment 255
Allegri, G; Corradi, S; Marchetti, M; Milinchuk, VK
- A quantitative study in synergistic effects of atomic oxygen and ultraviolet regarding polymer erosion in LEO space environment 265
Yokota, K; Seikyu, S; Tagawa, M; Ohmae, N
- The effects of polyethylene's structure on its interaction with a simulated LEO environment 273
Intrater, R; Lempert, G; Gouzman, I; Grossmann, E; Hoffman, A
- Use of Hubble Space Telescope degradation data for ground-based durability projection of ePTFE on ISS 281
de Groh, K; Banks, BA; Dever, JA; Hodermarsky, J
- Synergistic effects on thermal control coatings of SPOT spacecraft 291
Roussel, J-F; Faye, D; Alet, I
- Ionizing radiation effects on ISS ePTFE jacketed cable assembly 297
Koontz, S; Golden, J; Lorenz, M; Pedley, M
- Internal space charge measurement of materials in a space environment 303
Griseri, V; Fukunaga, K; Maeno, T; Payan, D; Laurent, C; Levy, L

Session 8: Ground Testing

Chair: Skurat, V; Chambers, A

- Atomic oxygen beam sources: a critical overview 313
Kleiman, J; Iskanderova, Z; Gudimenko, Y; Horodetsky, S
- Sources of hyperthermal atomic oxygen as sources of vacuum ultraviolet radiation 325
Skurat, V; Samsonov, P; Nikiforov, AP
- Characterization of candidate solar sail materials subjected to electron radiation 335
Edwards, D; Hubbs, W; Gray, P; Wertz, G; Hoppe, D; Nehls, M; Semmel, C; Albarado, T; Hollerman, W
- Cold welding due to impact and fretting under high vacuum 343
Merstallinger, A; Semerad, E; Dunn, B

The SIRENE facility - an improved method for simulating the charge of dielectrics in a charging electron environment <i>Dirassen, B; Levy, L; Reulet, R; Payan, D</i>	351
Evaluation of thermal control materials degradation in simulated space environment <i>Marco, J; Bhojaraj, H; Hulyal, R</i>	359
Effects of various wavelength ranges of vacuum ultraviolet radiation on Teflon® FEP film <i>Dever, JA; McCracken, C</i>	367
High-speed temperature and emissivity measurements for thermophysical property determination of conducting materials <i>Seifter, A; Boboridis, K; Obst, A</i>	375

[Session 9: Charging – CANCELLED]

Session 10: Modelling

Chair: Roussel, J-F; Semprimoschnig, C

Modelling of thruster plume induced erosion <i>Alred, J; Boeder, P; Mikatarian, R; Pankop, C; Schmidl, W</i>	383
ONERA ion erosion and contamination tests and their application to Astrium PPS modelling tool <i>Provost, S; Theroude, C; Tondou, T; Viel-Inguibert, V</i>	391
Modelling of white paints optical degradation using Mie's theory and Monte Carlo method <i>Duvignacq, C; Hespel, L; Roze, C; Girasole, T</i>	399
Predictive model for microcracking and mechanical properties of polymer-matrix composite materials for space applications <i>Issoupov, V; Viel-Inguibert, V; Dinguirard, M; Startsev, OV; Nikishin, E</i>	407

Session 11: Radiation/Flight

Chair: Dinguirard, M; Edwards, D

Evolution of thermo-optical properties and conductivity of a white space paint in geostationary environment <i>Tonon, C; Lavielle, D; Le Guevel, M; Duvignacq, C</i>	415
US lab condensate vent experiment and analysis <i>Schmidl, W; Alred, J; Mikatarian, R; Soares, CE; Miles, E; Howorth, L; Mishina, L; Murtazin, R</i>	423
Microparticle capture on the International Space Station using aerogel and polyimide foam <i>Neish, M; Imagawa, K; Inoue, T; Ishizawa, J; Kitazawa, Y; Yamaura, Y; Murakami, A; Ochi, Y</i>	431

Poster Session 1

COPS – A novel pressure gauge using MEMS devices for space <i>Graf, S; Sekler, J; Altwegg, K; Duvet, L; Rohner, U</i>	439
Cermet film space optical coatings <i>Woods, BW; Thompson, DW; Woollam, JA</i>	445
Influencing different ingredients on the tribological characteristics of compositions on the basis of plastic metals in vacuum <i>Solntsev, V; Skorokhod, V; Tykhyy, V; Frolov, G; Kostornov, A</i>	451
Determination of the chemical energy accommodation coefficient α on ceramic materials at high temperature under air plasma environment <i>Balat-Pichelin, M; Bedra, L; Issouпов, V</i>	455
Re-entry simulation chamber for thermo-mechanical characterisation of space materials <i>Liedtke, V</i>	461
Joining of zirconium boride based refractory ceramics to Ti ₆ Al ₄ V <i>Muolo, M; Ferrera, E; Morbelli, L; Zanotti, C; Passerone, A</i>	467
Erosion protection and surface conductivity enhancement of TOR polymers by Implantox™ technology <i>Iskanderova, Z; Kleiman, J; Mojazza, B; Sutton, M</i>	473

Poster Session 2

Simulations of ground- and space-based oxygen atom experiments <i>Cline, J; Buczala, D; Minton, T; Braunstein, M</i>	481
A study of atomic oxygen interactions with protected silver surfaces <i>Gouzman, I; Grossman, E; Murat, M; Noter, Y; Saar, N; Zilberman, G; Minton, TK; Garton, DJ; Buczala, D; Brunsvold, A</i>	487
Colour polymeric paints research under atomic oxygen in flight and ground-based experiments <i>Chernik, V; Naumov, S; Sokolova, S; Gerasimova, T; Kurilyonok, A; Poruchikova, J; Novikova, V</i>	493
Mechanism of etching of polyethylene by the atomic oxygen <i>Dorofeev, Y</i>	497
Review of Midcourse Space Experiment (MSX) satellite quartz crystal microbalance contamination results after 7 years in space <i>Wood, B; Uy, OM; Green, B; Bertrand, W; Lesho, J; Hall, D</i>	503
Iridium substrates for space contamination studies: erosion rates under atomic oxygen exposure <i>Yan, L; Woollam, JA</i>	509

Development of a European QCM-outgassing detector with miniaturised interfaces <i>Sekler, J; Wobmann, L</i>	515
Detection and cleaning of flux residue inside connectors <i>Pérez, G; Faye, D; Baradat, B; Ollé, M; Noyes, C</i>	521
Effects of ultraviolet and proton radiations on thermal control coatings after contamination <i>Faye, D; Marco, J</i>	527
The use of kinetic modelling as a fast way to screen thermal endurance of space materials <i>Moser, M; Heltzel, S; Semprimoschnig, C; Garcia Martin, G</i>	535

Poster Session 3

Electrostatic liquid microparticle accelerator for simulation of high velocity shock impacts in space <i>Novikov, LS; Soloviev, G; Bednyakov, S; Dzagurov, O; Shtyrlin, A; Nadiradze, A</i>	543
Numerical and experimental simulation of the mechanical behaviour of inflatable structures <i>Siguiet, J-M; Vialettes, P; Guigue, P; Karama, M; Mistou, S; Dalverny, O; Granier, S; Petitjean, F</i>	547
In-situ ESD testing at ESTEC's SORASI facility <i>Polsak, A; Van Eesbeek, M; Semprimoschnig, C</i>	553
Examination of the "specimen-size-effect" in stress-corrosion-cracking (SCC) tests <i>Semerad, E; Dunn, B</i>	559
Determination of the coefficient of moisture expansion (CME) <i>Poenninger, A; Defoort, B</i>	567
Experimental results on the influence of fluxes on partial discharge onset in PCB solder joints <i>Bulletti, A; Capineri, L; Materassi, M</i>	573
Debris measure subsystem of the nanosatellite IRECIN <i>Ferrante, M; Di Ciolo, L; Ortenzi, A; Petrozzi, M; Del Re, V</i>	579
The THERME experiment: in-flight measurement of the ageing of thermal control coatings <i>Remaury, S; Serène, F; Nabarra, P</i>	585
NASDA's space environment exposure experiment on ISS – first retrieval of SM/MPAC&SEED <i>Imai, F; Imagawa, K</i>	589
Investigation of materials of insurance and fixation arrangements (tapes, ropes, cords, halyards and others) that are used by cosmonauts during their work in open space <i>Naumov, S; Domoratsky, N; Sokolova, SP; Kuriljonok, A; Kosnina, E; Alexashin, VA; Skurat, V; Volkov, I; Berioskina, N; Leipunsky, I; Pshechenkov, P</i>	595

Investigation of screen-vacuum thermal insulation (SVTI) after prolonged exploitation in space environment conditions on external surfaces of space station “MIR” 603
Naumov, S; Gorodetsky, A; Domoratsky, A; Sokolova, SP; Gerasimova, T; Kurilyonok, AO; Svetchkin, V; Skurat, V; Beryoskina, NG; Leypunsky, IO; Pshetchenkov, P

Fitting of material parameters for DICTAT internal dielectric charging simulations using DCFIT 609
Rodgers, DJ; Ryden, KA; Wrenn, GL; Lévy, L; Sørensen, J

Poster Session 4

Origin of radiation-generated radicals within an irradiated polyimide 617
Iwata, M; Imai, F; Imagawa, K; Morishita, N; Kamiya, T

Improvements in UV stability for FEP/Ag based thermal control materials 623
Grieser, J; Maas, G

Irradiation facilities at SCK•CEN for radiation tolerance assessment of space materials 627
Fernandez Fernandez, A; Brichard, B; Berghmans, F

Testing and qualification of optical glasses for use in a space radiation environment; the advantages and pitfalls of using a parametric approach 633
Gusarov, A; Doyle, D; Kinet, D; Volchek, A

Radiation testing of coverglasses and second surface mirrors 643
Russell, J; Jones, G

Radiation effects of proton collisions in polymers 649
Briskman, B

Degradation of spacecraft polymer films by charged particle irradiation and its influences on charging/discharging events 655
Tahara, H

Influence orientation thrusters fuel/oxidizer reaction products on thermo-optic properties of spacecraft thermal control coatings 661
Naumov, S; Gerasimov, Y; Sokolova, S; Rebrov, S; Gerasimova, T; Kalistratova, O; Prokofyev, M; Grigorevsky, A; Prosvirikov, V; Buryak, A; Chernik, V

Additional Papers

The following papers were submitted ahead of the conference, but for reasons of 'force majeure' were unable to be presented

Effect of relative humidity fluctuations on the rate of LVR/NVR deposition <i>Rousseau, A; Maag, C</i>	669
In-flight investigations of geosynchronous spacecraft charging <i>Novikov, L; Sosnovets, E; Mar'in, B; Makletsov, A; Mileev, V; Feigin, V</i>	677
A study on resistance to VUV and charged particles for TiO ₂ /epoxy nanocomposites <i>Jiang, L; He, Shiyu; Li, C; Yang, D; He, Song</i>	681
A study on spectrum property of fused quartz under the influence of space charged particles with low energy <i>Liu, H; He, Shiyu; Wei, Q; Yang, D; Liu, Y; Wang, H; Abraimov, VV</i>	687
Study on the precursor for atomic oxygen resistant coating <i>Luo, Z; Liu, J; Hong, W; Tian, D; Cai, H; Xu, H; Tang, S; Zhu, R</i>	693
Methods and results of measurement of reflectance and emissivity properties of spacecraft coatings and materials <i>Vasiliev, V</i>	699
Compact energetic light particle detector and spectrometer <i>Green, B; Galica, G; Nakamura, T; Sullivan, J; Abe, T; Badono, S; Murata, S; Matsumoto, H; Koshiishi, H; Goka, T; Kimoto, Y</i>	703
A study on properties and chemical structure of polyimide film irradiated with protons <i>Peng, G; Yang, D; He, Shiyu</i>	709
Damage effects and mechanisms of proton irradiation on methyl silicone rubber <i>Zhang, L; He, S; Wei, Q</i>	715
The simulation of interaction of dielectric materials with soft space radiation <i>Baktybekov, K; Vasil'eva, I</i>	719
The effects of UV, electrons and protons on selection of binders and pigments for white thermal control coatings <i>Zeng, Y; Xiong, C; Liu, W; Feng, W</i>	723
Bulk charging of polymer films under electron irradiation <i>Sadovnichii, DN; Tyutnev, AP; Milekhin, YM</i>	727
List of Participants	733
