CONTENTS

Introduction
Welcome address
Dunn, B; Chairperson Programme Committee

Summary of the oral presentations
Van Eesbeek, M; Chairperson Organising Committee

Session 1
Opening
Chair: Dunn, B; Nikanpour, D

Electrostatic behaviour of materials in a charging space environment
Payan, D

Space and atmospheric environments: from low earth orbits to deep space
Barth, J

The selection and use of new materials in support of future ESA space science missions
Paulsen, T

Session 2: New Materials
Chair: Antonenko, J; Kleiman, J

Smart radiation device based on a perovskite manganese oxide
Tachikawa, S; Shimazaki, K; Ohnishi, A; Hirosawa, H; Shimakawa, Y; Ochi, A; Okamoto, A; Nakamura, Y

Development of solar reflector for geostationary spacecraft
Hidden, G; Martinez Vega, J; Remaury, S; Nabarra, P

Some preliminary evaluations of black coating on aluminium AA2219 alloy produced by plasma electrolytic oxidation (PEO) process for space applications
Shrestha, S; Merstallinger, A; Sickert, D; Dunn, BD

Sol-gel derived C-SiC composites and protective coatings for sustained durability in the space environment
Haruvy, Y; Liedtke, V

Polymerization processes in simulated free space conditions
Kondyurin, A; Lauke, B
Development of carbon-carbon sandwich panels

Panin, F; Lutz-Nivet, M; Lemaire, H

The effect of simulated space thermal environment on damping capacity of metal matrix composites

Jiang, X; Ouellet, L; Nikapour, D; Lo, J

Session 3: Atomic Oxygen

Chair: Banks, B; Grossman, J

Enhancement of surface durability of space materials and structures in LEO environment

Gudimenko, Y; Ng, R; Kleiman, J; Iskanderova, Z; Tennyson, RC; Hughes, PC; Milligan, D; Grigorevskiy, A; Shuiskiy, M; Kiseleva, L; Edwards, D; Finckenor, M

Nucleation and growth of nanoscale to microscale cylindrical pits in highly-ordered pyrolytic graphite upon hyperthermal atomic oxygen exposure

Nicholson, K; Minton, T; Sibener, SJ

Synthesis and atomic oxygen erosion testing of space-survivable POSS (polyhedral oligomeric silsesquioxane) polyimides

Gonzalez, R; Tomczak, S; Minton, T; Brunsvold, A; Hoflund, G

A QM/MM model for hyperthermal O(3P) collisions with hydrocarbon self-assembled monolayers

Troya, D; Schatz, G

Model atomic oxygen reactions: detailed experimental and theoretical studies of the reactions of ground-state O(3P) with H2, CH4, CH3CH3, and CH3CH2CH3 at hyperthermal collision energies

Minton, T; Garton, D; Troya, D; Maiti, B; Pascual, R; Schatz, G

The development of carbon-based sensors for the measurement of atomic oxygen

White, C; Rao, J; Roberts, G; Chambers, A; Lawson, KJ; Nicholls, JR

Scattered atomic oxygen effects on spacecraft materials

Banks, B; Miller, S; de Groh, K; Demko, R

An investigation of the resistance of POSS polyimide to atomic oxygen attack

Brunsvold, A; Minton, TK; Gouzman, I; Grossman, E; Gonzalez, RI
Session 4: Materials for Inner Planetary Environments

Chair: Passerone, A; Werling, E

Space environmental testing of thermal control foils at extreme temperatures
Semprimoschnig, C; Heltzel, S; Polsak, A; Van Eesbeek, M

Thermal control materials in Mercury environment
Antonenko, J

A detailed study on the thermal endurance of Kapton HN™ and Upilex S™
Heltzel, S; Semprimoschnig, C

Session 5: Contamination (part 1)

Chair: Novikov, L; Scialdone, J

Understanding and control of external contamination on the International Space Station
Soares, C; Mikatarian, R

The gaseous and particle environment observed above the MSX spacecraft after seven years on orbit
Uy, OM; Green, B; Wood, BE; Galica, G; Boies, M; Lesho, J; Cain, R; Hall, DF

Pressure and purging effects on material outgassing and evaporation
Scialdone, J

Session 6: Contamination (part 2)

Chair: Van Eesbeek, M; Soares, C

Re-evaporation of polymeric materials during outgassing experiments
Lesvenan, AL; Guyt, J; Schmeitzky, O; Van Eesbeek, M

VUV radiation interaction with outgassing products of black paints: in-situ NUV-VIS spectroscopy and complementary studies
Levy, N; Grossman, E; Gouzman, I; Noter, Y

Thruster plume induced contamination measurements from the PIC and SPIXEF flight experiments
Soares, C; Barsamian, H; Rauer, S

Study of the UV-enhancement of contamination
Pereira, A; Roussel, JF; van Eesbeek, M; Guyt, J; Schmeitzky, O; Faye, D

Outgassing of ISS payload pointing devices
Lobascio, C; Rampini, R
Use of quartz crystal microbalance on the polymer degradation studies regarding atomic oxygen activities in low earth orbit
Tagawa, M; Yokota, K; Kinoshita, H; Ohmae, N

**Session 7: Synergistics Effects**
*Chair: Dever, J; Tahawa, M*

On the degradation of polymeric thin films in LEO space environment
Allegri, G; Corradi, S; Marchetti, M; Milinchuk, VK

A quantitative study in synergistic effects of atomic oxygen and ultraviolet regarding polymer erosion in LEO space environment
Yokota, K; Seikyu, S; Tagawa, M; Ohmae, N

The effects of polyethylene’s structure on its interaction with a simulated LEO environment
Intrater, R; Lempert, G; Gouzman, I; Grossmann, E; Hoffman, A

Use of Hubble Space Telescope degradation data for ground-based durability projection of ePTFE on ISS
de Groh, K; Banks, BA; Dever, JA; Hodermarsky, J

Synergistic effects on thermal control coatings of SPOT spacecraft
Roussel, J-F; Faye, D; Alet, I

Ionizing radiation effects on ISS ePTFE jacketed cable assembly
Koontz, S; Golden, J; Lorenz, M; Pedley, M

Internal space charge measurement of materials in a space environment
Griseri, V; Fukunaga, K; Maeno, T; Payan, D; Laurent, C; Levy, L

**Session 8: Ground Testing**
*Chair: Skurat, V; Chambers, A*

Atomic oxygen beam sources: a critical overview
Kleiman, J; Iskanderova, Z; Gudimenko, Y; Horodetsky, S

Sources of hyperthermal atomic oxygen as sources of vacuum ultraviolet radiation
Skurat, V; Samsonov, P; Nikiforov, AP

Characterization of candidate solar sail materials subjected to electron radiation
Edwards, D; Hubbs, W; Gray, P; Wertz, G; Hoppe, D; Nehls, M; Semmel, C; Albarado, T; Hollerman, W

Cold welding due to impact and fretting under high vacuum
Merstallinger, A; Semerad, E; Dunn, B
The SIRENE facility - an improved method for simulating the charge of dielectrics in a charging electron environment
Dirassen, B; Levy, L; Reulet, R; Payan, D

Evaluation of thermal control materials degradation in simulated space environment
Marco, J; Bhojaraj, H; Hulyal, R

Effects of various wavelength ranges of vacuum ultraviolet radiation on Teflon® FEP film
Dever, JA; McCracken, C

High-speed temperature and emissivity measurements for thermophysical property determination of conducting materials
Seifter, A; Boboridis, K; Obst, A

[Session 9: Charging – CANCELLED]

Session 10: Modelling
Chair: Roussel, J-F; Semprimoschnig, C

Modelling of thruster plume induced erosion
Alred, J; Boeder, P; Mikatarian, R; Pankop, C; Schmidl, W

ONERA ion erosion and contamination tests and their application to Astrium PPS modelling tool
Provost, S; Theroude, C; Tondu, T; Viel-Inguitmert, V

Modelling of white paints optical degradation using Mie’s theory and Monte Carlo method
Duvignacq, C; Hespel, L; Roze, C; Girasole, T

Predictive model for microcracking and mechanical properties of polymer-matrix composite materials for space applications
Issoupov, V; Viol-Inguitmert, V; Dinguirard, M; Startsev, OV; Nikishin, E

Session 11: Radiation/Flight
Chair: Dinguirard, M; Edwards, D

Evolution of thermo-optical properties and conductivity of a white space paint in geostationary environment
Tonon, C; Lavielle, D; Le Guevel, M; Duvignacq, C

US lab condensate vent experiment and analysis
Schmidl, W; Alred, J; Mikatarian, R; Soares, CE; Miles, E; Howorth, L; Mishina, L; Murtazin, R

Microparticle capture on the International Space Station using aerogel and polyimide foam
Neish, M; Imagawa, K; Inoue, T; Ishizawa, J; Kitazawa, Y; Yamaura, Y; Murakami, A; Ochi, Y
Poster Session 1

COPS – A novel pressure gauge using MEMS devices for space
Graf, S; Sekler, J; Altweeg, K; Duvet, L; Rohner, U

Cermet film space optical coatings
Woods, BW; Thompson, DW; Woollam, JA

Influencing different ingredients on the tribological characteristics of compositions on the basis of plastic metals in vacuum
Solntsev, V; Skorokhod, V; Tykhyy, V; Frolov, G; Kostornov, A

Determination of the chemical energy accommodation coefficient on ceramic materials at high temperature under air plasma environment
Balat-Pichelin, M; Bedra, L; Issoupov, V

Re-entry simulation chamber for thermo-mechanical characterisation of space materials
Liedtke, V

Joining of zirconium boride based refractory ceramics to Ti₆Al₄V
Muolo, M; Ferrera, E; Morbelli, L; Zanotti, C; Passerone, A

Erosion protection and surface conductivity enhancement of TOR polymers by Implantox™ technology
Iskanderova, Z; Kleiman, J; Mojazza, B; Sutton, M

Poster Session 2

Simulations of ground- and space-based oxygen atom experiments
Cline, J; Buczala, D; Minton, T; Braunstein, M

A study of atomic oxygen interactions with protected silver surfaces
Gouzman, I; Grossman, E; Murat, M; Noter, Y; Saar, N; Zilberman, G; Minton, TK; Garton, DJ; Buczala, D; Brunsvold, A

Colour polymeric paints research under atomic oxygen in flight and ground-based experiments
Chernik, V; Naumov, S; Sokolova, S; Gerasimova, T; Kurilyonok, A; Poruchikova, J; Novikova, V

Mechanism of etching of polyethylene by the atomic oxygen
Dorofeev, Y

Review of Midcourse Space Experiment (MSX) satellite quartz crystal microbalance contamination results after 7 years in space
Wood, B; Uy, OM; Green, B; Bertrand, W; Lesho, J; Hall, D

Iridium substrates for space contamination studies: erosion rates under atomic oxygen exposure
Yan, L; Woollam, JA
Development of a European QCM-outgassing detector with miniaturised interfaces
Sekler, J; Wobmann, L

Detection and cleaning of flux residue inside connectors
Pérez, G; Faye, D; Baradat, B; Ollé, M; Noyes, C

Effects of ultraviolet and proton radiations on thermal control coatings after contamination
Faye, D; Marco, J

The use of kinetic modelling as a fast way to screen thermal endurance of space materials
Moser, M; Heltzel, S; Semprimoschnig, C; Garcia Martin, G

Poster Session 3

Electrostatic liquid microparticle accelerator for simulation of high velocity shock impacts in space
Novikov, LS; Soloviev, G; Bednyakov, S; Dzagurov, O; Shtyrlin, A; Nadiradze, A

Numerical and experimental simulation of the mechanical behaviour of inflatable structures
Siguier, J-M; Vialettes, P; Guigue, P; Karama, M; Mistou, S; Dalverny, O; Granier, S; Petitjean, F

In-situ ESD testing at ESTEC’s SORASI facility
Polsak, A; Van Eesbeek, M; Semprimoschnig, C

Examination of the “specimen-size-effect” in stress-corrosion-cracking (SCC) tests
Semerad, E; Dunn, B

Determination of the coefficient of moisture expansion (CME)
Poenninger, A; Defoort, B

Experimental results on the influence of fluxes on partial discharge onset in PCB solder joints
Bulletti, A; Capineri, L; Materassi, M

Debris measure subsystem of the nanosatellite IRECIN
Ferrante, M; Di Ciolo, L; Ortenzi, A; Petrozzi, M; Del Re, V

The THERME experiment: in-flight measurement of the ageing of thermal control coatings
Remaury, S; Serène, F; Nabarra, P

NASDA’s space environment exposure experiment on ISS – first retrieval of SM/MPAC&SEED
Imai, F; Imagawa, K

Investigation of materials of insurance and fixation arrangements (tapes, ropes, cords, halyards and others) that are used by cosmonauts during their work in open space
Naumov, S; Domoratsky, N; Sokolova, SP; Kuriljonok, A; Kosnina, E; Alexashin, VA; Skurat, V; Volkov, I; Berioskina, N; Leipunsky, I; Pshechenkov, P
Investigation of screen-vacuum thermal insulation (SVTI) after prolonged exploitation in space environment conditions on external surfaces of space station “MIR”

Naumov, S; Gorodetsky, A; Domoratsky, A; Sokolova, SP; Gerasimova, T; Kurilyonok, AO; Svetchkin, V; Skurat, V; Beryoskina, NG; Leypunsky, IO; Pshetchenkov, P

Fitting of material parameters for DICTAT internal dielectric charging simulations using DICFIT

Rodgers, DJ; Ryden, KA; Wrenn, GL; Lévy, L; Sørenson, J

Poster Session 4

Origin of radiation-generated radicals within an irradiated polyimide

Iwata, M; Imai, F; Imagawa, K; Morishita, N; Kamiya, T

Improvements in UV stability for FEP/Ag based thermal control materials

Grieser, J; Maas, G

Irradiation facilities at SCK•CEN for radiation tolerance assessment of space materials

Fernandez Fernandez, A; Brichard, B; Berghmans, F

Testing and qualification of optical glasses for use in a space radiation environment; the advantages and pitfalls of using a parametric approach

Gusarov, A; Doyle, D; Kinet, D; Volchek, A

Radiation testing of coverglasses and second surface mirrors

Russell, J; Jones, G

Radiation effects of proton collisions in polymers

Briskman, B

Degradation of spacecraft polymer films by charged particle irradiation and its influences on charging/discharging events

Tahara, H

Influence orientation thrusters fuel/oxidizer reaction products on thermo-optic properties of spacecraft thermal control coatings

Naumov, S; Gerasimov, Y; Sokolova, S; Rebrov, S; Gerasimova, T; Kalistratova, O; Prokofyev, M; Grigorevsky, A; Prosvirikov, V; Buryak, A; Chernik, V
Additional Papers

The following papers were submitted ahead of the conference, but for reasons of ‘force majeure’ were unable to be presented

Effect of relative humidity fluctuations on the rate of LVR/NVR deposition

Rousseau, A; Maag, C

In-flight investigations of geosynchronous spacecraft charging

Novikov, L; Sosnovets, E; Mar’in, B; Makletsov, A; Mileev, V; Feigin, V

A study on resistance to VUV and charged particles for TiO₂/epoxy nanocomposites

Jiang, L; He, Shiyu; Li, C; Yang, D; He, Song

A study on spectrum property of fused quartz under the influence of space charged particles with low energy

Liu, H; He, Shiyu; Wei, Q; Yang, D; Liu, Y; Wang, H; Abraimov, VV

Study on the precursor for atomic oxygen resistant coating

Luo, Z; Liu, J; Hong, W; Tian, D; Cai, H; Xu, H; Tang, S; Zhu, R

Methods and results of measurement of reflectance and emissivity properties of spacecraft coatings and materials

Vasiliev, V

Compact energetic light particle detector and spectrometer

Green, B; Galica, G; Nakamura, T; Sullivan, J; Abe, T; Badono, S; Murata, S; Matsumoto, H; Koshiishi, H; Goka, T; Kimoto, Y

A study on properties and chemical structure of polyimide film irradiated with protons

Peng, G; Yang, D; He, Shiyu

Damage effects and mechanisms of proton irradiation on methyl silicone rubber

Zhang, L; He, S; Wei, Q

The simulation of interaction of dielectric materials with soft space radiation

Baktybekov, K; Vasil’eva, I

The effects of UV, electrons and protons on selection of binders and pigments for white thermal control coatings

Zeng, Y; Xiong, C; Liu, W; Feng, W

Bulk charging of polymer films under electron irradiation

Sadovnichii, DN; Tyutnev, AP; Milekhin, YM

List of Participants

733
