

ESA SP-567
December 2004

Proceedings of

**The 4th International Conference on
Solar Power from Space
SPS '04**

Together with

**The 5th International Conference on
Wireless Power Transmission
WPT 5**

30 June - 2 July 2004
Granada, Spain

Organised by
ESA

Co-Sponsored by
Ministerio de Ciencia y Tecnología
Ciemat
USEF
CDTI
EADS Space Transportation
DLR

European Space Agency
Agence spatiale européenne

Honorary Chair

Peter Glaser

Conference Chairs

Wolfgang Seboldt (DLR, chair)

John Mankins (NASA HQ, vice-chair)

Nobuyuki Kaya (Kobe University, vice-chair)

Organising Committee

Leopold Summerer

Ross Henderson

Andrés Gálvez

Piero Messina

P. Diego

C. Quintana

Scientific and Technical Programme Committee

Ivan Bekey (Bekey Designs)

Henry Brandhorst (Auburn Univ.)

Gianclaudio Cassisa (Alenia Spazio)

Patrick Collins (Azabu Univ.)

Lucien Deschamps (EDF, Prospective 2100)

Richard M. Dickinson (JPL)

Alain Dupas (Prospective 2100)

David Faiman (Ben-Gurion University)

Andrés Gálvez (ESA)

Iskender Gökalp (CNRS)

Jerry Grey (AIAA)

Jim Haines (ESA)

Koichi Ijichi (USEF - METI)

Hiroshi Kanai (USEF - METI)

Kazuhiko Kato

Nobuyuki Kaya (Kobe Univ.)

Martin Lang (ESA)

Cyril Mangenot (ESA)

John Mankins (NASA)

Hiroshi Matsumoto (Kyoto Univ.)

Masahiro Mori (JAXA)

Franco Ongaro (ESA)

Guy Pignolet (Univ. La Réunion)

Volker Quaschnig (DLR)

Claus-Jürgen Reimers (ESA)

Wolfgang Seboldt (DLR)

Leopold Summerer (ESA)

Nicolai Tolyarenko (ISU)

Didier Vassaux (CNES)

Nejat Veziroglu (Univ. Miami)

Publication

Proc. of "The 4th Int. Conf. on Solar Power from Space - SPS '04", together with "The 5th Int. Conf. on Wireless Power Transmission - WPT 5", 30 June - 2 July 2004, Granada, Spain (ESA SP-567, December 2004)

CONTENTS

Keynote Lecture

Terrestrial Solar Power Plants – Current Perspectives and Long Term Visions <i>D. Faiman</i>	ix
---	----

Session O: SPS – Status Assessment

Chairpersons: W. Seboldt & F. Ongaro

Current Status of Study on Hydrogen Production with Space Solar Power Systems (SSPS) <i>M. Mori, H. Kagawa, H. Nagayama & Y. Saito</i>	3
Space Solar Power System for Terrestrial Power Utilities <i>Y. Kobayashi, T. Saito, K. Ijichi & H. Kanai</i>	11
Solar Power from Space – Validation of Options for Europe <i>L. Summerer & F. Ongaro</i>	17

Session 1: Space and Terrestrial/Planetary Solar Power Plants

Chairpersons (1a): V. Quintana & M. Mori

Chairpersons (1b): A. Dupas & S. Sasaki

Earth & Space-Based Power Generation Systems – A Comparison Study <i>M. Zerta, V. Blandow, P. Collins, J. Guillet, et al.</i>	29
Solar Power Satellite System Configured by Formation Flying <i>N. Takeichi, H. Ueno & M. Oda</i>	37
Solar Power Advanced Research Knowledge (SPARK) - A Computerised Model for Solar Power Satellite Concepts <i>D. Panzieri, M. Leccardi & G.C. Cassisa</i>	45

Session 2: Integration of SPS into a Hydrogen Economy and SPS Economics

Chairpersons: I. Gökalp & P. Collins

Energy Production from Solar Power Satellites – The Hydrogen Option <i>P. Schmidt, W. Weindorf & M. Zerta</i>	51
Synergies between Solar Power Supply from Space and Passenger Space Travel <i>P. Collins</i>	59

Economic Evaluation of Space Solar Power System <i>L. Matsuoka</i>	65
Feasibility of Commercialization of SSPS <i>N. Sakamoto, K. Namura, K. Kawasaki, K. Kito & H. Yoshida</i>	69
Economic Prerequisites for Space Solar Power <i>A. Smith</i>	75

Session 3: Large Scale Terrestrial Power Supply Scenarios (at PSA-Ciemat)

Chairpersons: D. Martinez & K. Kato

Terrestrial Solar Thermal Power Plants: On the Verge of Commercialization <i>M. Romero, D. Martinez & E. Zarza</i>	81
Solar Thermal Power Plants with Parabolic-Trough Collectors <i>E. Zarza, L. Valenzuela & J. León</i>	91
Concentrating on Solar Power in a Trans-Mediterranean Renewable Energy Co-Operation <i>F. Trieb, S. Kronshage & G. Knies</i>	99

Session 4: Wireless Power Transmission

Chairpersons: H. Matsumoto & A. Celeste

Monolithic and Hybrid Integrated ZB Converter Design <i>J. Zbitou, M. Latrach & S. Toutain</i>	111
Phased Array Technology with Phase and Amplitude Controlled Magnetron for Microwave Power Transmission <i>N. Shinohara & H. Matsumoto</i>	117
Development of Highly Efficient Active Integrated Antenna <i>T. Kimura, K. Yamamoto, T. Nakada & USEF SSPS Study Team</i>	125
Experimental Equipments for Microwave Power Transmission in Kyoto University <i>H. Matsumoto, K. Hashimoto, N. Shinohara & T. Mitani</i>	131
Phase Synchronous System of Separated Units <i>M. Tominaga, K. Morishita, T. Nakada, & USEF SSPS Study Team</i>	139

Session 5: Power for Space Applications
Chairpersons (a): P. George & H. Brandhorst
Chairpersons (b): R. Dittmann T. Takano

Proposal of a Viable Commercial Space Infrastructure Scenario Introducing Robotic Vehicles in an Earth Orbit Environment and its Interfaces to the SPS-Programme <i>R. Dittmann & B. Sommer</i>	147
Solar Power Satellites for Space Exploration and Applications <i>C. Cougnet, E. Sein, A. Celeste & L. Summerer</i>	151
Consideration of Practical and Logical Steps Towards the GEO SSPS Construction – Starting from Application of WPT for Unmanned Space Experiment Vehicle, and Beyond - <i>K. Ijichi, Y. Kobayashi & K. Hiroshi</i>	159
An Approach for Lunar Power – 24/29 <i>F. Little & H. Brandhorst</i>	165
Solar Cell Development on the Moon from In-Situ Resources <i>A. Ignatiev, A. Freundlich & C. Horton</i>	173

Session 6: Near-term demonstrators and experiments

Chairpersons (a): K. Ijichi & H. Brandhorst
Chairpersons (b): L. Summerer & N. Kaya

High Voltage Solar Concentrator Experiment with Implications for Future Space Missions - <i>S6a-35</i> <i>I.S. Mehdi P.J. George, M. O'Neill, R. Matson & A. Borckschmidt,</i>	179
Advanced Receiver/Converter Experiments for Laser Wireless Power Transmission <i>J.T. Howell, M.J. O'Neill & R.L. Fork</i>	187
Power Beaming for Space-Based Electricity on Earth: Near-Term Experiments with Radars, Lasers and Satellites <i>E. Hoffert, P. Soukup & M. Hoffert</i>	195
Wireless Power Transmission Technology Development and Demonstrations <i>F. Steinsiek, K-H. Weber, W-P. Foth, H.J. Foth & C. Schäfer</i>	202
Benefits of International Cooperation in a Low Equatorial Orbit SPS Pilot Plant Demonstrator Project - <i>S6b-10</i> <i>H. Matsuoka & P. Collins</i>	213

Tethered Solar Power Satellite for the Near-term Demonstration Experiment <i>S. Sasaki</i>	219
A 100 kW-Class Technology Demonstrator for Space Solar Power <i>J. Howell, C. Carrington & G. Day</i>	225
Rocket Experiment on Construction of Huge Transmitting Antenna for the SPS Using Furoshiki Satellite System with Robots <i>N. Kaya, M. Iwashita, S. Nakasuka, L. Summerer & J. Mankins</i>	231
Poster Session	
Experimental Research and Development on Noise Reduction of 2.45GHz CW Magnetron <i>T. Mitani, N. Shinohara, H. Matsumoto, M. Aiga & N. Kuwahara</i>	239
Solar Power Satellite Thermal Control Approach <i>E. Sacchi, G. Cassisa & M. Gottero</i>	245
Wide Band Power Rectenna with High Sensitivity Detection <i>J. Zbitou, M. Latrach & S. Toutain</i>	251
A Study on the Feasibility of Heat Transfer and Transport from Generator/Transmitter Combined Units of Assumed 10MW Space Solar Power System <i>H. Ohta, H. Kawasaki, S. Toyama, M. Mori et al.</i>	257
Simplification of a Microwave Transmission Antenna on Board by Reducing the Fed Elements <i>T. Takano, N. Kamo & A. Sugawara</i>	263
SPS Degradation and Environmental Impact: Effects of Extreme Background Conditions <i>R.S. Dhillon, T.R. Robinson & T.K. Yeoman</i>	269
Geoengineering Vision-Application for Space Solar Power <i>B.J. Eastlund & L.M. Jenkins</i>	275
Influences of Microwave Irradiation on Environment <i>H. Murakami, Y. Abe, T. Iwata, I. Kudo, K. Saito & T. Okuda</i>	281
A Preliminary Case Study for Rectenna Sites in Indonesia <i>Y. Purwanto & P. Collins</i>	287
List of participants	297
