

SP-571
November 2004

Proceedings of

The 4S Symposium

Small Satellites, Systems and Services

20 - 24 September 2004
La Rochelle, France

Sponsored by

Co-sponsored by

European Space Agency
Agence spatiale européenne

Symposium Committee

Chairpersons

Luca Maresi (ESA) and Daniel Hernandez (CNES)

Technical Committee

Yves Beguin (IAF)	Moshe Guelman (USAF/Technion University)
Richard Blott (Qinetiq)	Virendra Jha (CSA)
Michel Bousquet (Supaéro)	Marcos Machado (CONAE)
Daniel Caruso (CONAE)	Sias Mostert (Stellenbosch University)
Alex da Silva-Curiel (SSTL)	Darius Nikanpur (CSA)
Jérôme De Mesmay (CNES)	Udo Renner (T U Berlin)
Jean Dauphin (EADS-Astrium)	Michel Rougeron (CNES)
Rachel Drummond (KU Leuven)	Rainer Sandau (DLR)
Benedicte Escudier (Supaéro)	Francesco Svelto (ASI)
Amnon Ginati (ESA)	Frédéric Teston (ESA)
Luisella Giulicchi (ESA)	Ingrid Wysong (USAF)
Jun Gomi (NASDA)	

Publication	Proceedings of the 4S Symposium: Small Satellites, Systems and Services, 20 - 24 September 2004, La Rochelle, France (ESA SP-571, October 2004)
Edited by	B. Warmbein ESA Publications Division
Published and distributed by	ESA Publications Division ESTEC, Noordwijk, The Netherlands
Printed in	The Netherlands
Price	EUR 30
ISBN	92-9092-882-4
ISSN	1609-042X

CONTENTS

Opening Session

L. Maresi (ESA), D. Hernandez (CNES), Conference Chairs

Keynote Speeches

Mr. A. de Leffe, CNES Toulouse Space Centre Senior Advisor

Sir Martin Sweeting, SSTL Chief Executive

R. Schmidt, ESA Science Directorate

Mission and System Analysis

Chairs:

J. Gomi, JAXA

M. Rougeron, CNES

M. Sweeting, SSTL

Proteus platform and application satellites

Landiech, P. and Douillet, F.

Odin - Low cost and technically advanced – now 3.5 years in orbit

Frisk, U. et al.

Swedish small satellites

Lundahl, K., von Scheele, F.

Myriade Microsatellites: a new way for agencies and industry to various missions

Tatry, B. and Claire, M.-A.

SPIRALE: early warning optical space demonstrator

Galindo, D. and Carucci, A.

Ongoing & new project in observation and sciences using micro satellite

Deligny, B.

Proba, an ESA technology demonstration mission, results after 3 years in orbit
Teston, F., Bernaerts, D. and Gantois, K.

Space technology demonstration results of MicroLabSat
Takahashi, N., Hashimoto, H. et al.

System concepts and enabling technologies for an ESA low-cost mission to Jupiter / Europa
Renard, P., Koeck, C. et al.

Engineering a responsive, low cost, tactical satellite, TACSAT-1
Hurley, M., Duffey, T., et al

Perspectives & advanced projects for small satellite missions at Carlo Gavazzi Space
Morea, G. and Sabatini, P.

Multiple Spacecraft Missions

Chair:
F. Teston, ESA

Feasibility of the Proba 3 formation flying demonstration mission as a pair of microsats in GTO
Borde, J., Teston, F. et al.

Microsatellites : a key to very low access time and revisit period systems
Alary, D.

Microsatellites enabling multicaptor formation flying ; the Essaim demonstrator
Alary, D. and Carrin, G.

Small-sat platforms and formation flying: an opportunity for the gamma ray telescope MAX
Borde, J. and Von Ballmoos, P.

Real-time mosaic – rapid response, high resolution imaging from space
Da Silva Curiel, A., Wazni, M. et al.

ESA multiple small satellite EO missions
Tobias, A., Schoenberg, Andreas and Silvestrin, Pierluigi

Using an autonomous star tracker as formation flying sensor
Jørgensen, J.L., Denver, T. and Jørgensen, P.S.

Management and Organisation

Chairs:

M. Bousquet, Supaéro

K. Lundahl, SSC

Proba "spacecraft family" small autonomous satellites – a Belgian innovative export product

Bermyn, J., Du Pre, T. et al.

Technology transfer program of Microlabsat

Nakamura, Y. and Hashimoto, H.

Systems engineering on small satellite projects

Robertson, B., Radcliffe, D and Russell, S.

Migration of Orbcomm to the next satellite generation

Harms, J., Kalnins, I. and Maclay, T.

Launchers

Chairs:

Y. Beguin, IAF

J. De Mesmay, CNES

Contracting and launching small satellites with the Rockot launch vehicle

Kinnersley, M., Zorina, A. and Leclerc, J.

Feasibility study of a European launch system dedicated to micro satellites

Baiocco, P. and Espinosa, A.

The Vega launch vehicle

Geffroy, B., Fabrizi, R. et al.

Academic Projects

Chairs:

R. Drummond, KU Leuven,

B. Escudier, Supaéro

An educational-oriented cooperation between a SME and an Italian high school on microsatellite D&D methodologies

Perrotta, G., Cucinella, G. and Perelli, M.

The Supaero star tracker for the SSETI student microsatellite
Schaeffer, N., and Decourt, Y.

Electron emitter for small-size electrodynamic space-tether using MEMS technology
Fleron, R.A.W. and Blanke, M.

Low Earth orbit satellite attitude control by fractional control laws
Kailil, A., Mrani, N. et al.

Numerical investigation of the effects of altitude on thermal control of a small satellite
Shahryari, M., Khoshnam, F. and Khoddan, S.

Earth Observation

Chairs:

D. Nikanpour, CSA

R. Sandau, DLR

Résumés of the Bird mission
Lorenz, E., Bärwald, W. et al.

Microbolometer spectrometer, the multipurpose smallsat instrument
Leijtens, J., Court, A. and de Boom, K.

A superspectral microsatellite system for GMES land cover applications
Poinsignon, V., Duthil, P. and Poilvé, H.

A small satellite hyperspectral mission
Cutter, M.

Lapan-Tubsat : micro-satellite platform for surveillance & remote sensing
Triharjanto, R., Hasbi, W. et al.

Cibola flight experiment satellite
Davies, P., Buckley, J. et al.

High resolution SAR micro satellite based on active and passive reflectors
Bredin, C., Goutoule, J.-M. et al.

The role of small, cost effective spacecraft in the developing countries: the Algerian experience.
Bekhti, M., Benmohamed, M. and Sweeting, M.N.

Space Science

Chairs:

*B. Escudier, Supaéro
M. Rougeron, Supaéro*

AtmoCube: observation of the near Earth space environment to study "space weather" effects

Gregorio, A., Carrato, S. et al.

Demeter: on ground validation and first in flight results

Buisson, F., Cussac, T. and Parrot, M.

The APIES microsatellite mission to explore the asteroid belt

D'Arrigo, P. and Santandrea, S.

Technology & Subsystems

Chair:

W.H. Steyn, Stellenbosch University

A modular design for rapid-response telecoms and navigation missions

Davies, P. Liddle, D. et al.

A free software based approach for a low cost ground segment software development

Gatto, R.

A feasibility study of adaptive modulation techniques for small satellite communications

Sasada, T.; Shirakura, M. and Yajima, M.

The GPS receiver for small satellite

Zhang, H., Yang, C. et al.

Miniaturised star tracker (AA-STR) ready to fly

Boldrini, F., Procopio, D. et al.

High-precision onboard orbit determination for small satellites – the GPS-based XNS on X-SAT

Gill, E., Montenbruck, O. et al.

SMART- Small Motor Aerospace Technology

Balucani, M., Crescenzi, R. et al.

GSTB-V2/A normal mode AOCS design

Dungate, D., Hardacre, S. et al.

Platform control for space-based imaging: the TOPSAT mission
Dungate, D., Morgan, C. et al.

A view finder control system for an earth observation satellite
Steyn, H.

Temperature environment of battery pack on Hangtian-Tsinghua-1 micro-satellite
Luming, L., Long, H. et al.

Modular structure for small satellites
Marjoniemi, K., Syvänen, L. et al.

The EADS micropack project – an intelligent microsystem demonstrator for small mission applications
Eckersley, S., Schalk, J. and Koppenhagen, K.

μ Asc: a miniature star tracker
Jørgensen, P.S.; Jørgensen, J.L. and Denver, T.

High accuracy target tracking concepts
Denver, T., Jørgensen, P.S. and Jørgensen, J.L.

Nanospace-1, the MNT-based nanosatellite
Stenmark, L. and Koehler, J.

Posters

Fault tolerant computer for low Earth orbit micro satellites
Mohan, D., Arichandran, K. and McLoughlin, I.

High data rate x-band transmitter for low Earth orbit satellites
Sen, O., Sunay, H. et al.

Ground station software for receiving and handling Irecin telemetry data
Ferrante, M., Petrozzi, M. et al.

Micro digital Sun sensor: a lot of sensor for such a small package
Leijtens, J., de Boom, C.W. and van der Heiden, N.

List of Participants
