

Proceedings of the

International Workshop
on
Radiation of High Temperature Gases in Atmospheric Entry
Part II

30 September – 1 October 2004
Porquerolles, France

European Space Agency
Agence spatiale européenne

Scientific Committee

M. Capitelli	Univ. Bari
P. Charrier	Univ. Bordeaux
A. Chikhaoui	IUSTI, Marseilles
M. Dudeck	Lab. Aérodynamique, Orléans
D. Fletcher	VKI, Rhode Saint Genèse
C. Laux	École Centrale, Paris
C. Park	KAIST, Korea
O. Rouzaud	ONERA, Toulouse
A. Smith	FGE, UK
S. Surzhikov	IPM, Moscow
M. Winter	IRS, Stuttgart

Organisation Committee

Aziz Chikhaoui	Polytech'Marseille (Contact Person)
Jeanne Pullino	Polytech'Marseille
Pascal Boubert	Polytech'Marseille
Jean Marie Félio	Polytech'Marseille
Catherine Rond	Polytech'Marseille
Michel Dudeck	Paris 6/CNRS Orleans
Francesca Cipollini	ESA/ESTEC
Domenico Giordano	ESA/ESTEC
Lionel Marraffa	ESA/ESTEC
Jean-Marc Charbonnier	CNES
Pierre Omaly	CNES

Publication Proceedings of Radiation of High Temperature Gases
in Atmospheric Entry, Part II
Porquerolles, France (ESA SP-583, April 2004)

Compiled by: K Fletcher

Published and distributed by: ESA Publications Division

CONTENTS

Invited/General Papers

Invited-1	Overview of radiation problems in planetary entries <i>Chul Park</i>	3
Invited-3	Radiation Intensity Parameter Tables for Carbon Monoxide <i>Chul Park</i>	15
G-2	Perspectives on the development of accurate non-equilibrium radiation models for planetary atmospheric entries <i>Lino da Silva, Dudeck</i>	23

Test Case 2

TC2-1	Studies of the radiative emission behind a shock wave in Titan like mixture on TCM2 shock tube <i>Catherine Rond, Pascal Boubert, Jean-Marie Félio, Aziz Chikhaoui</i>	33
TC2-2	Radiation calculation in non-equilibrium shock layer <i>Joanne Dubois</i>	41
TC2-3	Rebuilding flowfield and radiation testcase for Titan atmosphere <i>F Mazoué, L Marraffa</i>	47

Test Case 3

TC3-1	TC3: Convective and radiative heating of MSRO for simplest kinetic models <i>Sergey T. Surzhikov</i>	55
TC3-2	Preliminary study of Mars entry: application to the prediction of radiation <i>Philippe Reynier, Mario Lino da Silva, Lionel Marraffa, Franck Mazoué</i>	63
TC3-3	ONERA activities on Testcase TC3 <i>O. Rouzaud, T.Soubrié, L. Tessé, F. Longueteau</i>	75
TC3-synth	Synthesis and analysis for Test Case 3 <i>Pierre Omaly, Walter Dieudonne, Martin Spel</i>	81

Test Case 4

TC4-1	Numerical, analytical and experimental investigation of convective and radiative heating of a martian descent module <i>O. Rouzaud, S. Zlukhtov, I. Egorov, D. Fletcher, V. Gromov, E. Nagnibeda, Yu. Shevelev, S. Surzhikov, L. Marraffa, P. Omaly</i>	93
-------	--	----

TC4-3	Definition of a new level-one test case – measurements of equilibrium radiation from an inductively coupled plasma in the near-UV to near-IR spectral region for a martian-type CO ₂ -N ₂ mixture <i>D. Vacher, G. Faure, M. Lino da Silva, M. Dudeck, and P. André</i>	99
TC4-4	Modelling of the arc-jet plasma flow in the sr5 nozzle using a thermochemical Nonequilibrium and a state-to-state approach <i>M. Lino da Silva, E. Passarinho, B. Izrar, T. Alexandrova, M. Dudeck</i>	105
TC4-5	Preparation of a possible test case 4 - numerical rebuilding of Fire II <i>F. Cipollini, O. Rouzaud, L. Tournebize, L. Marraffa, F. Mazoué</i>	113
TC4-6	Spectrally resolved emission measurements in ICP torch plasmas for Titan atmosphere mixtures <i>Mickaël Playez, Benjamin Vancrayenest, Matthew E. Zuber, Douglas G. Fletcher</i>	121

Descriptions of the Test Cases

Test Case 1	129
Test Case 2	135
Test Case 3	153
