

SP-585
August 2005

**9th European Symposium on
Life Sciences Research in Space**

**26th Annual International
Gravitational Physiology Meeting**

Cologne, Germany
26 June – 1 July 2005

Organised by
ESA
ISGP

***European Space Agency
Agence spatiale européenne***

LOCAL ORGANISER

Martina Heer

ORGANISING COMMITTEE

Yolanda Spaans

Patrik Sundblad

Nicole Sentse

Charles Fuller

Peter Norsk

Bobbi Jo Coon

SCIENTIFIC COMMITTEE

Charles Fuller

Martina Heer

Peter Norsk

ISGP COUNCIL OF TRUSTEES

P. Norsk, Chairman Denmark

C.G. Blomqvist, USA

A. Cogoli, Switzerland

V. Convertino, USA

V.R. Edgerton, USA

C.A. Fuller, USA

O.G. Gazenko, Russia

C. Gharib, France

A. Grigoriev, Russia

H.G. Hinghofer-Szalkay, Austria

K. Kirsch, Germany

I.B. Kozlovskaya, Russia

R. Kvetnansky, Slovakia

T. Mano, Japan

J. Seylaz, France

Publication	Proceedings of the 9 th European Symposium on Life Sciences Research in Space / 26 th Annual International Gravitational Physiology Meeting, Cologne, Germany, 26 June – 1 July 2005 (ESA SP-585, August 2005)
Edited by	B. Warmbein ESA Publications Division
Published and distributed by	ESA Publications Division ESTEC, Noordwijk, The Netherlands
Printed in	The Netherlands
Price	EUR 30
ISBN	92-9092-896-4
ISSN	1609-042X

**ESA / ISGP Life Science Symposium 2005
Table of Contents**

Invited Papers

Restoration of central blood volume: Application of a simple concept and simple device to counteract cardiovascular instability in syncope and hemorrhage

Convertino, V.A., Cooke, W.H. and Lurie, K.G.

System specificity in responsiveness to intermittent -Gx gravitation during simulated microgravity in rats

Zhang, L.-F.

Neurovestibular adaptation to short radius centrifugation

Jarchow, T. and Young, L.R.

Short-term exposure of *Arabidopsis* cell cultures to hyper-G: Short-term changes in transcription regulation expression

Babbick, M. and Hampp, R.

Modulation of gene expression in bone cells during strain-adapted bone remodeling

Klein-Nulend, J., Bacabac, R.G., Vatsa, A. et al.

Human adaptation genetic response suites: Toward new interventions and countermeasures for spaceflight

Sundaresan, A. and Pellis, N.R.

Are clock genes involved in altered circadian rhythms during space flight?

Egli, M., Bertram, R., Cogoli-Greuter, M. et al.

Cardiorespiratory Physiology and Body Fluid Regulation

Chairs: N. Christensen and S. Iwase

WISE-2005: Integrative cardiovascular responses with LBNP during 60-day bed rest in women

Hughson, R.L., Kerbeci, P., Arbeille, P. et al.

Intracranial pressure increases during weightlessness: A parabolic flights study

Denise, P., Normand, H., Buzer, L. et al.

Lower limb and portal veins echography for predicting risk of thrombosis during a 90-day bed rest

Arbeille, P. A., Kerbeci, P., Porcher, M. et al.

Calf tissue liquid stowage and muscular and deep vein distension in orthostatic tests after a 90-day head down bed rest

Arbeille, P. A., Kerbeci, P., Audebert, P. et al.

Morphology of brain vessels in the tail-suspended rats exposed to intermittent 2 G

Gulevskaya, T.S., Morgunov, V.A., Krasnov, I.B. et al.

Alterations in vasoreactivity of femoral artery induced by hindlimb unweighting are related to the changes of contractile protein in rats

Ma, J., Ren, X.L., Meng, Q.J. et al.

Respiratory sinus arrhythmia: A marker of decreased parasympathetic modulation after short duration spaceflight.

Migeotte, P.F., Sá, R.C., Prisk, K. G. et al.

Adaptation of the baroreflex sensitivity to microgravity: Data from the STS-107 Columbia mission
Di Rienzo, M., Parati, G. and Castiglioni, P.

Results of cardiorespiratory system autonomic regulation investigations during long term International Space Station missions: Experiment "Pulse"
Baevsky, R.M., Baranov, V.M., Chernikova, A.G. et al.

Effects of prolonged head-down bed rest with and without fly-wheel exercise on heart rate variability
Pavy-Le Traon, A., Curnier, D., Bernard, J. et al.

Cell and Molecular Biology

Chairs: L. Buravkova and J. Duke

Molecular mechanisms of gravity-dependent signaling in human melanocytic cells involve cyclic GMP
Ivanova, K., Lambers, B., Block, I. et al.

Microgravity-induced matrix remodelling is linked to reduction in tension of human dermal fibroblasts
Guignandon, A., Lambert, C., Rega, G. et al.

Influence of long-term gravity vector changes of human mesenchymal stem cells in vitro
Buravkova, L.B., Merzlikina, N.V., Romanov, Y.A. et al.

A quantitative analysis of human monocytes motility in modeled low gravity conditions
Cogoli-Greuter, M., Galleri, G., Meloni, M.A. et al.

Cell and Developmental Biology

Chairs: L. Buravkova and J. Duke

Microgravity and signaling molecules in rat osteoblasts: Downstream of receptor tyrosine kinase, G-protein-coupled receptor, and small GTP-binding proteins
Kumei, Y., Shimokawa, H., Morita, S. et al.

Rapid nitric oxide production by bone cells in response to mechanical vibration
Bacabac, R.G., Smit, T.H., van Loon, J.J.W.A. et al.

The role of possible feedback mechanisms in the effects of altered gravity on formation and function of gravireceptors of mollusks and fish
Kondrachuk, A. and Boyle, R.

Prenatal centrifugation: A model for fetal programming of adult weight?
Baer, L.A., Rushing, L., Wade, C.E. et al.

Young Researchers 1 – 3

Chairs: C. Fuller and R. Hemmersbach

Resistance exercise with concurrent whole body vibration preserves isometric knee extension strength during 8 weeks of horizontal bed rest
Mulder, E.R., Stegeman, D.F., Gerrits, K. et al.

Cortical regions associated with orthostatic stress in conscious humans
Kimmerly, D.S., O'Leary, D.D., Cechetto, A. et al.

Long-term overactivity in the abdominal oblique muscles after 8 weeks bed-rest - possible implications for musculoskeletal health

Belavy, D.L., Richardson, C.A., Wilson, S. et al.

Effects of Ca²⁺-binding agent EGTA on fiber contractility and content of sarcomeric cytoskeletal proteins of hindlimb suspended rats

Litvinova, K.S., Vikhlyantsev, I.M., Podlubnaya, Z.A. et al.

Relations between prooxidant and antioxidant variables in hypergravity

Timchenko, A., Utko, N., Bezrukov, V. et al.

Effect of 6 days of support withdrawal on characteristics of balance function

Sayenko, D., Artamonov A.A., Ivanov, O.G. et al.

Cytotoxic activity of natural killer cells in vitro under microgravity

Grigorieva, O.V., Buravkova, L.B. and Rykova, M.P.

Hypergravity modulates cyclic GMP efflux in nitric oxide-stimulated human melanocytic cells

Stieber, C., Ivanova, K., Block, I. et al.

Gene expression variations during *Drosophila* metamorphosis in space. The GENE experiment in the Spanish cervantes mission to the ISS

Herranz, R., Benguria, A., Medina, F.J. et al.

SAYSOY – Space Apparatus to Yield SOYsprouts: Growing sprouts in a growth support system for experiments on unmanned platforms in space

De Micco, V., Aronne, G., Scala, M. et al.

Magnetic levitation and gravity: Influences on microbial systems

Dijkstra, C., Anthony, P., Davey, M.R. et al.

Behaviour of gravisensitive cells on 2D and 3D clinostats

Strauch, S., Hemmersbach, R., Seibt, D. et al.

Musculoskeletal Systems

Chairs: P. Di Prampero and J. Zange

Peripherally and centrally induced electromyographic changes in 8 weeks of horizontal bed rest with and without resistance exercise with concurrent whole body vibration

Stegeman, D.F., Mulder, E.R., Gerrits, K. et al.

Muscle fibre conduction and fatigue during dynamic actions on a flywheel exercise device

Pozzo, M., Alkner, B., Norrbrand, L. et al.

Effects of heat stress on the regeneration of injured skeletal muscle in rats

Yoshioka, T., Goto, K., Kojima, A. et al.

MRI measures of the lumbo-pelvic muscles in bedrest and follow up: Implications for exercise countermeasures in microgravity

Richardson, C., Hides, J., Wilson, S. et al.

Non-uniform shifts in MHC and SERCA isoform patterns in unloaded rat soleus. Effects of Ca-binding agent

Shenkman, B.S., Moukhina, A.M., litvinova, K.S. et al.

Artificial gravity: Physiological perspectives for long-term space exploration

di Prampero, P. and Antonutto, G.

Measures of complexity to quantify bone loss and estimate strength of human lumbar vertebrae: Comparison of CT image analysis with bone histomorphometry and biomechanical tests
Saparin, P., Thomsen, J. S., Beller, G. et al.

Quantitative MR imaging for the in vivo assessment of trabecular bone quality
Toffanin, R., Strolka, I., Cova, M. et al.

Plant Physiology
Chair: D. P. Häder

Nutritional and flavour components of *Brassica rapa* L. grown on ISS
Musgrave, M., Kuang, A., Blasiak, J. et al.

Actin organization and gene expression in *Beta vulgaris* seedlings under clinorotation
Kozeko, L.Y., Shevchenko, G.V., Artemenko, O.A et al.

Differentiation of plant graviperceiving and graviresponding cells in altered gravity
Kordyum, E.L., Martyn, G.G., Shevchenko, G.V. et al.

Effects of weightlessness on cell proliferation and ribosome biogenesis in *Arabidopsis* root meristems
Matia, I., González-Camacho, F., Marco, R. et al.

Cardiorespiratory Physiology and Body Fluid Regulation
Chairs: I. Christensen and S. Iwase

Influence of weightlessness and apnea on heart rate and blood pressure regulation during exercise
Hoffmann, U., Smerecnik, M. and Essfeld, D.

Evaluation of space capacities of the respiratory muscles during hypokinesia
Baranov, V.M., Aleksandrova, N.P. and Tikhonov, M.A.

Psychology / Endocrinology
Chair: O. Angerer

Effects of head down tilt upon cortisol and sex hormones
Strollo, F., Pecorelli, L., Uva, B.M. et al.

BIOLAB - Science & Hardware
Chair: E. Brinckmann

The German ISS experiment Cellular Responses to Radiation in Space (CERASP): The effects of single and combined space flight conditions on mammalian cells
Baumstark-Khan, C., Hellweg, C. and Arenz, A.

Status of the SOS-LUX-Toxicity-Test on the International Space Station
Rabbow, E., Rettberg, P., Baumstark-Khan, C. et al.

Phagocytosis as a biomarker for stress responses
Huber, K., Krötz-Fahning, M. and Hock, B.

TRIPLE-LUX-B: Phagocytosis in mussel hemocytes
Hansen, P.D. and Unruh, E.

Role of the RhoGTPases in the cellular receptivity and reactivity to mechanical signals including microgravity

Nusgens, B.V., Chometon, G., Guignandon, G. et al.

Hardware development for electrophysiological long-term studies in space

El-Din Sallam, A., Schmäh, M. and Horn, E.R.

SCORPI and SCORPI-T: Neurophysiological experiments on animals in space

Serafini, L., Ramacciotti, T., Vigano, W. et al.

Neuroscience & Sensory Motor Physiology

Chairs: F. Wuyts and A. Clarke

Do perception and postrotatory vestibulo-ocular reflex share the same gravity reference?

Lorincz, E. and Hess, B.J.M.

Vestibular adaptation to changing gravity levels and orientation of Listing's plane

Nooij, S., Le Mair, A.F., Bos, J. et al.

Impact of simulated microgravity and caloric restriction on autonomic nervous system function in adipose tissue

Boschmann, M., Adams, F., Tank, J. et al.

Posters: Cardiorespiratory Physiology & Body Fluid Regulation

Angiotensinogen expression in vascular tissues of simulated weightless rats

Bao, J.X., Zhang, Z.T., Zhang, L.F. et al.

Pilots' examination in a rapid LBNP exposure

Dosel, P., Hanousek, J., Petricek, J. et al.

3-D ballistocardiography, a tool revisited for following astronaut cardiovascular function?

Migeotte, P.-F., Colin, F., Sá, R.-C. et al.

Effects of water temperature on cardiac autonomic nervous system modulation during foot immersion (foot bath)

Nishimura, M., Ono, K and Onodera, S.

Free cortisol and salivary alpha-amylase levels during a six-hour-water immersion in healthy young men

Rohleder, N., Wirth, D., Frassl, W. et al.

Heart rate variability in evaluation of functional state and types of autonomic regulation under conditions of space flight

Chernikova, A.G.

Effect of hypergravity on catecholamine levels in telemetrically collected blood of rats during centrifugation

Kvetnansky, R., Petrak, J., Mravec, B. et al.

Hemodynamic changes in post-suspension rats during gradual hemorrhage

Vinogradova, O., Borovik, A., Tsvirkoun, D. et al.

Astronauts autonomic regulation reserves evaluation during pre- and postflight examinations

Pashenko, A.V.

The effect of simulated microgravity on nitrenergic innervation of the middle cerebral artery
Fadyukova, O., Tarasova, O., Tsvirkoun, D. et al.

Calcium channels are differentially activated in cerebral and hindquarter arteries of rats during simulated microgravity
Xie, M.J., Fu, Z.J., Zhang, L.F. et al.

Effect of swimming suits' difference at supine position in water on heart rate, rectal temperature and sense of subjective temperature
Ono, K. and Onodera, S.

Detailed structural analysis on retinal vascular bed by automated computer processing of fluorescein angiography
Noszek, A., Garab, S., Nemes, J. et al.

Posters: Musculoskeletal Systems, Neuroscience & Sensory-Motor Physiology

Body position reproducibility and joint alignment stability criticality on a muscular strength research device
Núñez, F., Romero, A., Clua, J. et al.

A perspective for ultrasonic assessment of osteoporotic changes of bone structure in proximal tibia
Tatarinov, A., Gowin, W., Beller, G. et al.

Role of afferent input and mechanical load for size regulation of rat soleus muscle
Kawano, F., Matsuoka, Y., Oke, Y. et al.

Effect of 7-days dry immersion in combination with mechanical stimulation of foot support zones upon resistance to fatigue of knee extensors and flexors
Ntreba, A., Khusnutdinova, D., Vinogradova, O. et al.

European network using fish as osteoporosis research models (ENFORM)
Goerlich, R., Renn, J., Alestrom, P. et al.

Depressed tetanic contactile function cannot be compensated by increasing stimulating frequency in unloaded soleus muscle
Gao, F., Yu, Z.B.^G

Influence of rat hindlimb suspension on sacrolemmal dystrophin and its sensitivity to mechanical damage
Gasnikova, N.M. and Shenkman, B.S.

Tenotomy of m. soleus antagonists prevents the changes in fiber type characteristics and sarcomeric cytoskeletal proteins in unloaded rats
Moukhina, A., Ardabievskaya, A., Vikhlyantsev, I. et al.

Mechanical and/or neural activity-dependent regulation of soleus muscle fibers of mdx mice
Terada, M., Kawano, F., Lan, Y.B. et al.

Effect of artificial gravity with exercise load by using a short-arm centrifuge with bicycle ergometer as a countermeasure against disused osteoporosis
Shiozawa, Y., Iwase, S., Kamiya, A. et al.

How does the nucleolar number involve in muscle fiber atrophy? Response to Beta-guanidinopropionic acid supplementation
Matsuoka, Y., Kawano, F., Oke, Y. et al.

Different responses in soleus muscle fibers of Wistar and Wistar Hannover rats to hindlimb unloading
Wang, X.D., Kawano, F., Terada, M. et al.

Mechanical stimulation of the foot support zones as a way to maintain activity of the tonic muscular system during functional support derivation
Miller, T., Ivanov, O., Galanov, D. et al.

Dynamics of changes of shin and hip muscles contractive properties under dry immersion conditions
Khusnutdinova, D, Netreba, A., Miller, T. et al.

Characteristics of the eyes pursuit function during readaptation to terrestrial gravity after prolonged flights aboard the International Space Station (ISS)
Kornilova, L., Alekhina, M.I., Temnikova, V.V. et al.

Structural reappraisal of dendritic tree of cerebellar Purkinje cell for novel functional modeling of elementary sensorimotor adaptive processes
Simon, L., Garab, S. and Noszek, A.

Orpheus 0 G or ear In microgravity to establish symptoms concomitant of inner and middle ear and osteoporosis in microgravity
Tomatis, A., Talbi, .L, Vervoort. J. et al.

The relevance of the minimization of torque exchange with the environment in weightlessness is confirmed by a simulation study
Tagliabue, M., Pedrocchi, A., Pedotti, A. et al.

Hypergravity-induced changes of neuronal activities in CA1 region of rat hippocampus
Kumei, Y., Zeredo, J., Shimokawa, R. et al.

Compound mechanism hypothesis on +Gz-induced brain injury and dysfunction of learning and memory
Sun, X., Li, J.S., Cao, X.S. et al.

Audiological findings in antiorthostatic position modelling microgravitation
Nagy, E., Bencze, G., Csengery, A. et al.

Environmental challenge impairs prefrontal brain functions
Balazs, L., Czigler, I., Grosz, A. et al.

Virtual environment, a behavioral and countermeasure tool for assisted gesture in weightlessness: Experiments during parabolic flights
Fass, D.

Investigating human cognitive performance during spaceflight
Pattyn, N., Migeotte, P., Demaeseleer, W. et al.

Understanding visual perception in the perspective of gravity
Villard, E., Tinto Garcia-Moreno, F., Peter, N. et al.

Perception of body vertical in microgravity during parabolic flight
Arnesen, T.N., Olsen, M.H., Sylvestre, B. et al.

Analysis of *Pseudomonas aeruginosa* growth and virulence in modelled microgravity
Guadarrama, S., Pulcini, E.de L.; Broadaway, S. C. et al.

Comparison of the effects of *DL-threo-Beta-benzyloxyaspartate* on the glutamate release from synaptosomes before and after exposure of rats to artificial gravity
Borisova, T., Krisanova, N. and Himmelreich, N.

Posters: Nutrition & Metabolism, Plant Physiology and Cell and Molecular Biology

Changes in the topography of cellular components in pea root stratocytes exposed to high gradient magnetic field

Belyavskaya, N.A., Polishchuk, O.V. and Kondrachuk, A.V.

New space greenhouse concept development for optimal plant growth

Ivanova, T., Kostov, P., Sapunova, S. et al.

Ultrastructural peculiarities and galactolipid contents in *Chlorella* cells in altered gravity

Popova, A.

Growth of cress seedlings and morphogenesis of root Gravisensors under clino-rotation and in unidirectional red or blue light

Rakleviciene, D, Svegzdiene, D, Tamulaitis, G. et al.

Interactions of light and gravity in *Chara* internodal cells

Staves, M., Whitsit, K. and Yeung, E.

Investigation of cress root gravisensing und low magnitude acceleration

Svegzdiene, D. and Rakleviciene, D.

A role of peroxydases in acceleration of the aging of potato minitubers under influence of microgravity

Nedukha, O., Kordyum, E., Martyn, G. et al.

Changes in ultrastructure of mitochondria in root apex cells of soybean seedlings in microgravity

Klymchuk, D.

The influence of clinorotation on root cell differentiation in *Brassica Rapa* seedlings

Kalinina, Y.

Gene expression of $\delta 1$ - and $\delta 3$ -cyclins in root meristem cells of *Pisum sativum L.* under clinorotation.

Artemenko, O. A.

Expression of small heat shock proteins from pea seedlings under gravity-altered conditions

Talalaev, A.S.

Effect of sampling schedule on pharmacokinetic parameter estimates of promethazine in astronauts

Boyd, J.L., Wang, Z.W. and Putcha, L.

Modeled gravity alters the cell metabolism “rate” and not the cell metabolism

Coinu, R., Chiaviello, A., Covelli, B. et al.

Comparison of cognitive performance for promethazine pharmacodynamics in human subjects

Vaksman, Z., Boyd, J.L., Wang, Z. et al.

Association of hormonal responses and performance of student pilots during acceleration training on the human centrifuge

Wirth, D., Rohleder, N. and Welsch, H.

Superoxide dismutase, catalase, glutathione peroxidase, and glutathione reductase in the heart of hypergravity-treated and aging rats

Utko, N.

Production of cytokines by human PBMCs in simulated microgravity

Bakos, A., Várkonyi, A., Minárovits, J. et al.

Last call for Biorack – Results of 82 experiments in orbit

Brinckmann, E.

Advantages of simulated microgravity in the production of compounds of industrial relevance
Versari, S., Villa, A., Barengi, L. et al.

Modelled microgravity alters the Na⁺, K⁺-ATPase activity in rat heart homogenates
Peana, A.T., Pippia, P., Paci, S. et al.

Effects of vector-averaged gravity on the response to different stimulatory signals in T-Cells
Vadrucci, S., Henggeler, D., Lovis, P. et al.

Effects of space-flight simulation on human cells
Villa, A., Versari, S., Barengi, L. et al.

Altered gravity causes the changes in the proteins NopA100 in plant cell nucleoli
Sobol, M.A., Gonzalez-Camacho, F., Kordyum, E.L. et al.

Three dimensional culture of the murine osteoblastic cell line OCT-1 on collagen coated microcarriers
Lau, P., Hellweg, C.E., Kirchner, S. et al.

Centrifugation effects on estrous cycle, mating success and pregnancy outcome in rats
Ronca, A.E., Rushing, L., Tou, J., et al.

Monitor activity, temperature and heart rate with a mouse telemeter to be used for animal research on board the international space station
van Essen, G., Masseling, B.H.C.J., Jansen, M. et al.

Seeds-in-space education experiment during the Dutch Soyuz mission DELTA
Van Loon, J.J.W.A., Wamsteker, J.A. and Weterings, K.A.P.

Posters: Research Platforms and Technology

High performance laser scanning confocal microscope for microgravity research
Beghuin, D., van de Ven, M., Ameloot, M. et al.

Evaluation of radiation effects and dose thresholds definition in the REMSIM study
Guarnieri, V., Lobascio, C., Nieminen, P. et al.

Core data model proposal for physiology research in space
Duwe, H., Wilke, D., Schwartzmann, D. et al.

MISS - Mice on International Space Station
Falcetti, G.C. and Schiller, P.

BIOLAB experiment development status 2005
Brinckmann, E. and Manieri, P.

Mouse Drawer System (MDS): An autonomous hardware for supporting mice space research
Liu, Y., Biticchi, R., Alberici, G. et al.

BIOLAB crew training
Illmer, N. and Müllerschrkowski, U.

The ERASMUS experiment archive
Isakeit, D., Sabbatini, M. and Carey, W.

ESA ground based facilities
Jost, P.D., Binot, R.A. and Schmitt, D.A.

The BIOLAB Facility Responsible Center at the German Aerospace Center DLR
Schuber, M., Seibt D., Esser, P. et al.

An innovative approach for the assessment of 3D structures in trabecular bone
Marwan, N., Saporin, P., Thomsen, J. et al.

Diminished performance of bacterial fuel cells in microgravity
de Vet, S.J. and Rutgers, R.

New technique for simulation of microgravity and variable gravity conditions
de la Rosa, R., Alonso, A., Abásolo, D. E. et al.

Effect of simulated microgravity on *Aspergillus niger*
Pratap, J.J.

Magnetic levitation: Development of experimental techniques for application to biological systems
Anthony, P., Davey, M.R., Dijkstra, C. et al
