

SP-591
July 2005

Proceedings of the

**11th European Space Mechanisms
and Tribology Symposium
ESMATS 2005**

21-23 September 2005
Lucerne, Switzerland

**European Space Agency
Agence spatiale européenne**

ORGANISING COMMITTEE

D. Manzoni	(Host-Chairman)	Contraves Space
P. Kerhousse	(Chairman)	ESA/ESTEC
A. Borrien	(Co-Chairman)	CNES
U. Somaini	(Co-Chairman)	SSIG
F. Artigas		SENER
T. Blais		EADS Astrium
J-L. Bozet		Université de Liège
B. Cauwe		Techspace Aero
F. Champandard		Alcatel Space
M. Falkner		Austrian Aerospace
V. Gass		Ruag Aerospace
P. Guay		CNES
E. Roberts		ESTL, AEA Technology
M. Schmid		EADS Astrium GmbH
E. Suetta		Galileo Avionica
R. Zwanenburg		Dutch Space
E. Boesiger	(US Coordinator)	Lockheed Martin
H. Hintermann	(Hon. Member)	
B. Warmbein	(Proc. Editor)	ESA
H. Schib	(Local Organiser)	Contraves Space

Publication	Proceedings of the 11 th European Space Mechanisms and Tribology Symposium (ESMATS 2005), 21 – 23 September 2005, Lucerne, Switzerland (ESA SP-591, July 2005)
Edited by	B. Warmbein ESA Publications Division
Published and distributed by	ESA Publications Division ESTEC, Noordwijk, The Netherlands
Printed in	The Netherlands
Price	EUR 40
ISBN	92-9092-902-2
ISSN	0379-6566

CONTENTS

Session 1: Miniature Mechanisms

Chairman: E. Boesiger (Lockheed Martin, USA)

- Development and qualification of a sample translation system for a fluid science experiment in the International Space Station 3
P.-A. Mäusli, G. Feusier and C. Pereira
- Miniature zero-backlash gears and actuators for precision positioning applications 9
R. Slatter and R. Degen
- Reliability of MEMS (microsystems) for space applications 17
H. R. Shea

Session 2: Pointing Mechanisms (1)

Chairman: P. Guay (CNES, France)

- Fast steering mirror for laser communication 27
H. Langenbach and M. Schmid
- Gimballing magnetic bearing reaction wheel with digital controller 35
B. Gerlach, M. Ehinger, H. K. Raue et al.
- A compact SADM family 41
V. Barbet, C. Le Quintrec, X. Jeandot et al.
- GAIA M2M positioning mechanism 47
E. Urgoiti, A. Ramirez and P. Coste

Session 3: Tribology

Chairman: A. Merstallinger (ARCS, Austria)

- The effect of 17-4PH stainless steel on the lifetime of a Pennzane® lubricated microwave limb sounder antenna actuator assembly ball screw for the AURA spacecraft 57
W. R. Jones, Jr., M. J. Jansen, Gun-Shing Chen et al
- Space lubrication and performance of harmonic drive gears 65
I. Schafer, P. Bourlier, F. Hantschack et al.
- Effect of test environment on the lifetime of a vacuum lubricant 73
S. V. Pepper
- Development of highly hydrogenated DLC coatings for solid lubricant applications in space 77
A. Vanhulsel, F. Velasco, R. Jacobs et al

Session 4: Instruments Mechanisms

Chairman: F. Champandard (Alcatel Space, France)

Design and qualification of the mechanisms for the ALADIN instrument <i>G. Székely and F. Henzelin</i>	85
Magnetic suspension based fourier transform infrared spectrometer mechanism (FTIS) <i>I. Köker, H. Langenbach, M. Schmid et al.</i>	91
The design and flight performance of the MOPITT instrument mechanisms <i>D. Caldwell, J. Hackett, A. Gibson et al.</i>	99
Development and test program of the wheel mechanisms for the Mid Infra-Red Instrument (MIRI) of the James Webb Space Telescope <i>R. Hofferbert, D. Lemke, A. Böhm et al.</i>	107

Session 5: Mechanisms Components (1)

Chairman: B. Cauwe (Techspace Aero, Belgium)

Small sized slip-ring endurance testing <i>J.B. Mondier</i>	117
SADM Potentiometer anomaly investigations <i>B. Wood, D. Mussett, O. Cattaldo et al.</i>	125
Development and qualification of the International Space Station Centrifuge slip ring assembly <i>M. Sjöholm, P.-A. Mäusli, V. Gass et al.</i>	133

Session 6: Deployment & Hold-down Mechanisms (1)

Chairman: P. Urmston (ESA/ESTEC, the Netherlands)

The development of a simplified fin folding mechanism for a future space transportation vehicle <i>B. Wood, B. Heinrich, G. Sutter et al.</i>	143
Cryostat cover mechanism for the Herschel satellite: Design & qualification test results <i>P. Janu, M. Falkner, L. Supper et al.</i>	153
Mechanisms for GAIA deployable sunshield <i>E. Uργοiti and G. Migliorero</i>	163
A strain free lock and release mechanism for an elastically suspended two-axis gimbal <i>A. Asadurian</i>	171

Session 7: Pointing Mechanisms (2)

Chairman: S. Debei (University of Padua, Italy)

High temperature antenna pointing mechanism for BepiColombo mission <i>J. Mürer, R. Harper and M. Anderson</i>	185
High accuracy flexural hinge development <i>I. Santos, I. Otiz de Zárate and G. Migliorero</i>	195
Antenna pointing mechanism with integrated hold down and release function <i>H. J. Jung, F. Bleuer and J. Kasper</i>	203
A novel sun tracking mechanism <i>N. Viswanatha, T.S. Simil, N. Prasad et al.</i>	211

Session 8: Deployment & Hold-down Mechanisms (2)

Chairman: F. Hansen (NASA/JSC, USA)

A new synchronization concept for solar array deployments <i>Y. Baudasse, L. D'Abrigeon and N. Pingault</i>	219
Solar array deployment qualification for the LMX line of buses <i>K. Lee</i>	225
SMOS PLM MIRAS hold-down release and deployment mechanisms <i>J. I. Bueno, I. Garcia and M. A. Plaza</i>	235
Application of "Maeva" hinge to MYRIADE microsattelites deployments needs <i>J. Sicre, D. Givois and A. Emerit</i>	243

Session 9: Mechanisms Components (2)

Chairman: M. Schmid (EADS Astrium GmbH, Germany)

Miniaturized, long life, oscillating operations slip ring assembly for on board rotative equipment <i>A. Delachaux, G. Feusier, P.-A Mäusli et al.</i>	253
An introduction to bearing active preload systems - Technology and performance benefits <i>S. Lewis and M.E. Humphries</i>	261
A novel concept for a tool exchange device <i>G. Kester and M. Visser</i>	271

Posters

Miniature mechanisms

- Design and evaluation of a polyimide spring system for the scanning force microscope of the PHOENIX Mars mission 2007 281
D. Parrat, S. Gautsch, L. Howald et al.
- A prototype cryogenic pickoff arm for multi IFU spectrometers 289
M. Dowling, P. McMahon, S. Ramsay Howat et al.

Equipment mechanisms

- Results from 10 years of reaction/momentum wheel life testing 299
P. McMahon and R. Laven

Components

- High torque miniature rotary actuator 307
R. Nalbandian
- Design and testing of piezo motors for non-magnetic and/or fine positioning applications 311
M.F. Six, R. Le Letty, R. Seiler et al.
- Rotary actuator for space applications 317
J. A. Andión, C. Burgui and G. Migliorero
- Development of a new European brushless DC motor family 323
B. Bonduelle and C. Casteras
- Travelling wave ultrasonic motor for aerospace applications 329
A. Iula, A. Corbo and M. Pappalardo
- A shape memory alloy actuator for solar array deployments 337
V. Barbet, L. D'Abrigeon, F. Champandard et al.
- The latest developments in the field of Voice Coil Actuators 344
M. Godkin

Tribology

- Surface and tribological properties of MoS₂-based lubricants retrieved from real LEO space environment: the first and second year results obtained by SM/SEED 347
M. Akiyama, K. Matsumoto, H. Asada et al.
- Self lubricating composites for medium temperatures in space based on polyimide SINTIMID
A. Merstallinger, H. Bieringer, E. Kubinger et al.

Session 1: Miniature Mechanisms

*Chairman: E. Boesiger
(Lockheed Martin, USA)*

Session 2: Pointing Mechanisms (1)

Chairman: P. Guay

(CNES, France)

Session 3: Tribology
Chairman: A. Merstallinger
(ARCS, Austria)

Session 4: Instruments Mechanisms

Chairman: F. Champandard

(Alcatel Space, France)

Session 5: Mechanisms
Components (1)
Chairman: B. Cauwe
(Techspace Aero, Belgium)

**Session 6: Deployment & Hold-down
Mechanisms (1)**

*Chairman: P. Urmston
(ESA/ESTEC, the Netherlands)*

Session 7: Pointing Mechanisms (2)

Chairman: S. Debei

(University of Padua, Italy)

**Session 8: Deployment &
Hold-down Mechanisms (2)**

*Chairman: F. Hansen
(NASA/JSC, USA)*

**Session 9: Mechanisms
Components (2)**

*Chairman: M. Schmid
(EADS Astrium GmbH, Germany)*
