

Proceedings of

‘i-SAIRAS 2005’

**The 8th International Symposium
on
Artificial Intelligence, Robotics
and Automation in Space**

5-8 September 2005
Munich, Germany

**European Space Agency
Agence spatiale européenne**

Symposium Chair Panel

Bernd Sommer (DLR), Gianfranco Visentin (ESA), Jean-Claude Piedboeuf (CSA),
Mitsushige Oda (JAXA), Richard J. Doyle (NASA)

American Programme Committee

Benjamin Smith, (NASA/JPL), Butler Hine (NASA/ARC), David Korsmeyer (NASA/ARC), Eric Martin (CSA),
Erick Dupuis (CSA), Illah Nourbakhsh (NASA/ARC), Jean-Claude Piedboeuf (CSA), Matthew Barry (NASA/HQ),
Michel Doyon, (CSA), Paul Schenker (NASA/JPL), Peter Hughes (NASA/GSFC), Reid Simmons (CMU),
Richard J. Doyle (NASA/JPL), Richard Volpe (NASA/JPL), Robert Savely, (NASA/JSC), Samad Hayati (NASA/JPL)

Asian Programme Committee

Hiroshi Ueno (JAXA), Kazuya Yoshida (Tohoku University), Keiki Takadama (Tokyo Institute of Technology)
Mitsushige Oda (JAXA), Noriyasu Inaba (JAXA), Saburo Matunaga (Tokyo Institute of Technology),
Shinichi Kimura (NICT), Shinichi Nakasuka (University of Tokyo), Shinichiro Nishida (JAXA), Takashi Kubota
(JAXA)

European Programme Committee

Alessandro Donati (ESA/ESOC), Angelo Olivieri (ASI), Bernd Sommer (DLR), Gianfranco Visentin (ESA/ESTEC),
Michel Maurette (CNES)

European Organising Committee

Bernd Sommer (DLR), Gianfranco Visentin

Publication Proceedings of the i-SAIRAS 2005 - 8th International
Symposium on Artificial intelligence, Robotics and
Automation in Space, Munich, Germany
(ESA SP-603, August 2005)

Contents

Session 1 - Programmatic

Robotic Programmes and Applications at ESA: Present and Perspectives
G. Visentin

Overview of A&R within Japan's Space Program
M. Oda

Session 2a - Rover Development

Chair: S. Hayati

Development of the ESA ExoMars Rover
M. Van Winnendael, J. Vago & P. Baglioni

Design of a High-Mobility Low-Weight Lunar Rover
A. Winterholler, M. Roma, T. Hunt & D. Miller

Design and Control of a Passively Steered, Dual Axle Vehicle
*M. Wagner, S. Heys, D. Wettergreen, J. Teza, D. Apostolopoulos, G. Kantor,
& W. Whittaker*

The NANOKHOD Microrover - Development of an Engineering Model for Mercury
surface Exploration
A. Schiele, J. Romstedt, C. Lee & S. Klinkner

Session 2b - Orbital Missions (03)

Chair: B. Sommer

Orbital Robotics Spiral Evolution for Future Exploration Missions
D. King & C. Ower

ROKVIS – Robotics Component Verification on ISS
*G. Hirzinger, K. Landzettel, D. Reintsema, C. Preusche, A. Albu-Schäffer, B. Rebele
& M. Turk*

A Feasibility Study of Robotic Servicing for the Hubble Space Telescope
*M. Oda, S. Nishida, N. Inaba, T. Yamamoto, N. Abe, K. Yasuda, F. Kuwano,
& N. Kubota*

Session 2c - Spacecraft Autonomy 1

Chair: A. Donati

AGATA, A Lab Bench Project for Spacecraft Autonomy

M. C. Charmeau & E. Bensana

Plan Execution Interchange Language (PLEXIL) for Executable Plan and Command Sequence

V. Verma, T. Estlin, A. Jonsson, C. Pasareanu, R. Simmons & K. Tso

Situation Awareness of Onboard System Autonomy

D. Schreckenghost, C. Thronesbery & M. Hudson

Towards Spacecraft Docking Emulation using Hardware-in-the-Loop Simulation

E. Martin, K. Parsa, S. Laurier Chapleau, & L. Baron

Session 3a - Mobility Analysis

Chair: M. Van Winnendaal

Multibody System Modelling and Simulation of Planetary Rover Mobility on Soft Terrain

A. Gibbesch & B. Schaefer

Development of a Dynamic Simulation Tool for the ExoMars Rover

R. Bauer, W. Leung & T. Barfoot

Steering Trajectory Analysis of Planetary Exploration Rovers Based on All-Wheel Dynamics Model

G. Ishigami, A. Miwa & K. Yoshida

EXOMARS Rover Chassis Analysis and Design

A. Ellery, N. Patel, L. Richter, R. Bertrand & J. Dalcomo

Session 3b - Robotics Technologies 1

Chair: M. Oda

Actual End Effector Trajectories Computation for Redundant Free-Floating Space Manipulators

B. Schäfer, R. Krenn & B. Rebele

NMSU Nanosat with Robotics Capabilities

O. Ma & S. Horan

Guidance and Control of “Tethered Retriever” with Collaborative Tension-Thruster Control for Future On-Orbit Service Missions
Y. Nakamura, F. Sasaki & S. Nakasuka

Utilization of Distributed Momentum Control for Planning Approaching Trajectories of a Space Manipulator to a Target Satellite
D. Dimitrov & K. Yoshida

Session 3c - Spacecraft Autonomy 2

Chair: R. Doyle

Distributed Planning and Scheduling for Space System Flotillas
A. Brambilla, M. Lavagna, A. Da Costa, & A. E. Finzi

Multiagent-Based Scheduling and Execution of Activities for Space Systems
G. Sangiovanni, S. Farè, F. Amigoni & M. Lavagna

A Unified and Efficient Algorithmic Approach to Model-based Diagnosis and Optimal Sensor Placement
A. Fijany & F. Vatan

An Evolutionary Algorithm for Near-Optimal Autonomous Resource Management
A. Carrel & P. Palmer

Session 4a - Subsurface Robotics

Chair: A. Behar

Design and Optimization of a Terrestrial Guided Mole for Deep Subsoil Exploration - Boring Performance Experimental Analysis
R. Campaci, S. Debei, R. Finotello, G. Parzianello, C. Bettanini, M. Giacometti, G. Rossi, G. Visentin & M. Zaccariotto

Drilling Automation for Subsurface Planetary Exploration
B. Glass, H. Cannon, S. Hanagud & J. Frank

Automated Core Sample Handling for Future Mars Drill Missions
A. Winterholler, M. Roman, D. Miller, J. Krause & T. Hunt

An Automated Sample Acquisition & Preparation System for LORAX
M. Murarka, A. Iyer, D. Miller, T. Taber & T. Hunt

Session 4b - Rover Technologies

Chair: T. Kubota

Multiple-Target Single Cycle Instrument Placement

L. Pedersen, M. Deans, D. Lees, S. Rajagopalan & D. Smth

Second Experiments in the Robotic Investigation of Life in the Atacama Desert of Chile

D. Wettergreen, N. Cabrol, V. Baskaran, F. Calderon, S. Heys, D. Jonak, A. Lüders, D. Pane, M. Smith, J. Teza, P. Tompkins, D. Villa, C. Williams, M. Wagner, A. Waggoner, S. Weinstein & W. Whittaker

Rover Design for Polar Astrobiological Exploration

L. Pedersen, D. Wettergreen, D. Apostolopoulos, C. McKay, M. DiGoia, S. Heys, J. Teza, M. Wagner & K. Al Ali

Efficient Constrained Path Planning via Search in State Lattices

M. Pivtoraiko & A. Kelly

Session 4c - Autonomous Science

Chair: S. Chien

Optimally Solving Nadir Observation Scheduling Problems

R. Knight & B. Smith

An Onboard Data Analysis Method to Track the Seasonal Polar Caps on Mars

K. Wagstaff, R. Castano, S. Chien, A. Ivanov, E. Pounders & T. Titus

Learning Classifiers for Science Event Detection in Remote Sensing Imagery

R. Castano, D. Mazzoni, N. Tang, T. Doggett, S. Chien, R. Greeley, B. Cichy & A. Davis

Session 5a - Alternative Mobility 1

Chair: D. Lavery

New Planetary Explorer with Appropriate Mobility Mechanism for Gravity Environment

S. Shimoda, T. Kubota & I. Nakatani

Hopping Robot for Planetary Exploration

E. Dupuis, S. Montminy & P. Allard

Session 5b - Control System Engineering 1

Chairs: B. Sommer

Self-organizing Control Techniques for Modular Robotic Arms within Space Applications

G. Casalino & A. Turetta

PLATFORM: An Integrated Approach to Robotics and Space Navigation Validation. Designing and Setting the Robotic Test-Bed

A. García Casas, A. Tomassini & F. Gandía

Validation Process of the STVF Hardware-in-the-Loop Simulation Facility

E. Martin, M. Doyon, Y. Gonthier & C. Lange

Session 5c - Mission Operation Technologies 1

Chair: A. Donati

Cooperating Onboard and on the Ground Decision Modules for the Management of an Earth Watching Constellation

S. Damiani, G. Verfaillie & M.-C. Charmeau

Autonomous Response in an Autonomous Earth Observing Sensorweb

S. Chien, B. Cichy, D. Tran, G. Rabideau, A. Davies, R. Sherwood, R. Castano, D. Mandl, S. Frye, S. Shulman, S. Ungar, T. Brakke, J. Descloitres, C. Justice, R. Sohlberg, R. Wright, L. Flynn, A. Harris, R. Brakenridge, S. Cacquard, S. Nghiem, R. Greeley, T. Doggett, V. Baker, F. Ip & J. Dohm

Cooperation between Onboard Executive and Planner on Ground and Its Demonstration on Remote-Sensing Nano-Satellite "PRISM"

R. Funase & S. Nakasuka

Development of Autonomous Distributed Ground Operation System for Pico Satellites Under Low Baud-Rate Communications

N. Miyashita & S. Matunaga

Session 6a - Alternative Mobility 2

Chair: G. Visentin

Extremely Low Mass Spherical Rovers for Extreme Environments and Planetary Exploration Enabled with MEMS

F. Bruhn, K. Pauly, V. Kaznov

ARAMIES: A Four-legged Climbing and Walking Robot

D. Spenneberg, M. Albrecht, T. Backhaus, J. Hilljegerdes, F. Kirchner & H. Zschenker

Multi-Limbed Rover for Asteroid Surface Exploration Using Static Locomotion
M. Chacin & K. Yoshida

Session 6b - Control System Engineering 2

Chair: G. Casalino

Model Checking of Robotic Control Systems
S. Scherer, F. Lerda & E. Clarke

Enabling Interoperable Space Robots with the Joint Technical Architecture for Robotic Systems (JTARS)
A. Bradley, S. Dubowsky, R. Quinn & N. Marzwell

Autonomous Robotics Toolbox
E. Dupuis, P. Allard & R. L'Archevêque

Session 6c - Mission Operation Technologies 2

Chair: S. Chien

Coordinated Science Campaign Scheduling for Sensor Webs
R. Morris, J. Dungan, W. Edgington, J. Williams, J. Carlson, D. Fleming & T. Wood

Automating Deep Space Network Scheduling and Conflict Resolution
M. Johnston & B. Clement

MUST - A Platform for Introducing Innovative Technologies in Operations
A. Baumgartner, J. A. Martinez-Heras, A. Donati & M. Quintana-Claramunt

Session 7a - Rover Missions

Chairs: E. Dupuis

Sun-Synchronous Lunar Polar Rover as a First Step to Return to the Moon
F. Teti, W. Whittaker, S. Kherat, T. Barfoot & C. Sallaberger

Robotic Technologies for Space Exploration at MDA
C. Sallaberger, P. Fulford, C. Ower, N. Ghafoor & R. McCoubrey

A Fully Autonomous Mining System Controller for In Situ Resource Utilization
D. S. Boucher, E. C. Edwards & G. B. Sanders

Session 7b - Dynamics 1

Chair: M. Oda

Experimental Validation of CDT-based Satellite Docking Simulation using SOSS Test Facility

O. Ma, G. Yang & X. Diao

On-Orbit Maneuvering of Large Space Flexible Structures by Free-Flying Robots

Y. Ishijima, D. Tzeranis & S. Dubowsky

Robotics Experimental Study for SSPS Walking and Assembly Technology

H. Ueno, M. Oda & K. Inaba

Motion and Parameter Estimation of a Free-Floating Space Object from Range Data for Motion Prediction

U. Hillenbrand & R. Lampariello

Session 7c - Human/Robot 1

Chair: D. Wettergreen

NASA's Mobile Agents Architecture: A Multi-Agent Workflow and Communication System for Planetary Exploration

M. Sierhuis, W. J. Clancey, R. L. Alena, D. Berrios, S. Buckingham Shum, J. Dowding, J. Graham, R. van Hoof, C. A. Kaskiris, S. Rupert & K. S. Tyree

Progress Towards Task-Level Collaboration between Astronauts and their Robotic Assistants

R. Effinger, A. Hofmann & B. Williams

Results in Sliding Autonomy for Multi-Robot Spatial Assembly

F. Heger, L. Hiatt, B. Sellner, R. Simmons & S. Singh

Session 8a - Rover Autonomy

Chair: S. Hayati

Intelligent Rover Decision-Making in Response to Exogenous Events

C. Chouinard, T. Estlin, D. Gaines & F. Fisher

Autonomy Software Architecture for LORAX
(Life On Ice Robotic Antarctic eXplorer)

A. Jonsson, C. McGann, L. Pedersen, M. Iatauro & S. Rajagopalan

Data Mining During Rover Traverse: From Images to Geologic Signatures

D. Thompson, T. Smith & D. Wettergreen

Experiments with Autonomous Software for Planetary Robots: A Simulation Success Story

L. Flückiger, C. Neukom, G. Pisanich, E. Buchanan, M. Wagner & L. Plice

Session 8b - Dynamics 2

Chair: J. -C. Piedboef

Vibration Suppression Experiments of Flexible Payload Transportation by Space Robotic Arm with Redundant DOF

S. Matunaga, H. Sawada, K. Konoue & M. Asami

Input Shaping Experiment for Damping Vibration in Manual Operation of a Large Robotic Arm

H. Sawada, K. Konoue, S. Matunaga, H. Ueno & M. Oda

Performance Improvement of JEMRMS in Light of Vibration Dynamics

S. Abiko, K. Yoshida, Y. Sato & K. Shoji

On the Manipulation of Large Flexible Structural Modules by Robots Mounted on Large Flexible Structures

D. Tzeranis, Y. Ishijima & S. Dubowsky

Session 8c - Human/Robot 2

Chair: L. Pedersen

Visual Aids for Lunar Rover Tele-Operation

D. Miller & K. Machulis

Predictive Interfaces for Long-Distance Tele-operations

K. Wheeler, R. Martin, M. Allan & V. Sunspiral

Human Machine Cooperative Tele-Driving System and Path Trajectory Compensation with Land Mark Selection

Y. Kunii, M. Moriyama, S. Nagatsuka, N. Ishimaru & T. Kubota

Session 9a - Perception

Chair: E. Dupuis

A Sun Tracker for Planetary Analog Rovers

M. Deans, D. Wettergreen & D. Villa

Scanning Laser Rangefinder for Accurate Arm Placement and Inspection
M. Bualat, C Kunz, J. Lavelle, L. Pedersen & S. Schuet

^{3D}LASSO: Real-Time Pose Estimation from 3D Data for Autonomous Satellite Servicing
S. Ruel, C. English & P. Church

Tridar: A Hybrid Sensor for Exploiting the Complimentary Nature of Triangulation and LIDAR technologies
C. English, S. Zhu, C. Smith, S. Ruel & I. Christie

Session 9b - Robotics Technologies 2

Chair: H. Ueno

Precise Assembly by Autonomous Space Robot Using Skill Acquisition Learning
H. Tanaka, N. Yamamoto, T. Yairi & K. Machida

Stereo Vision Measurement System Qualification and Preliminary Performance Test Results
R. Finotello, S. Losito, C. Mondellini, G. Rossi & M. Zampato

Heterogeneous Robotic Systems for Assembly and Servicing
A Stroupe, T. Huntsberger, B. Kennedy, H. Aghazarian, E. Baumgartner, A. Ganino, M. Garrett, A. Okon, M. Robinson & J. Townsend

Session 9c - Autonomous FDIR 1

Chair: R. Morris

A Tractable Approach to Probabilistically Accurate Mode Estimation
O. Martin, S. Chung & B. Williams

Adaptive Limit-checking for Spacecraft using Relevance Vector Autoregressive Model
R. F. Fujimaki, T. Y. Yairi & K. M. Machida

Diagnosis Method for Spacecraft Using Dynamic Bayesian Networks
Y. Kawahara, R. Fujimaki, T. Yairi & K. Machida

Autonomous Diagnosis based on Software-Extended Behaviour Models
T. Mikaelian, B. C. Williams & M. Sachenbacher

Session 10a - Rover GNC 1

Chair: A. Ellery

Robot Actions Planning And Execution Control For Autonomous Exploration Rovers
M. Gallien, F. Ingrand & S. Lemaï

Terrain Adaptive Generation of Optimal Continuous Trajectories for Mobile Robots
T. Howard & A. Kelly

Towards Autonomous Long Range Navigation
E. Dupuis, P. Allard, J. Bakambu, T. Lamarche, W. Zhu & I Rekleitis

Session 10b - Aerial Robotics Technologies

Chair: G. Visentin

DALOMIS - A Data Transmission and Localization System for Swarms of Microprobes
A. Schiele, J. Laycock, A. W. Ballard, M. Cosby & E. picardi

Autonomous Flight Control for a Titan Exploration Aerobot
A. Elfes, J. Montgomery, J. Hall, S. Joshi, J. Hall, J. Payne & C. Bergh

The PICO Satellite and Uninhabited Aerial Vehicle Systems Engineering (Pause)
Mars Aerobot
A. Behar, C. Raymond, J. Matthews & E. Means

Advanced Vision System for Exploration by a Planetary Aerobot
M. Vergauwen, G. Matthews, L. van Gool & B. Fontaine

Session 10c - AI Methods

Chair: M. Lavagna

Equilibrium Shaping: Distributed Motion Planning for Satellite Swarm
D. I. Izzo & I. P. Pettazzi

BioSim: Simulating Space Habitats for Artificial Intelligence Research
D. Kortenkamp & S. Bell

An Intelligent Agent for On-Demand Mission Data Products
K. Golden, R. Nemani, W. Pang & P. Votava

Adaptive Task Flow Management of Distributed Spacecraft Bus based on Multi Agent Reinforcement Learning
T. Eishima & S. Nakasuka

Plenary Talk

The EO-1 Autonomous Sciencecraft and Prospects for Future Autonomous Space Exploration

S. Chien

Session 11a - Rover GNC 2

Chair: T. Kubota

New Position Estimation Method Based on Map Matching for Planetary Rover

K. G. Moesl, T. Kubota, T. Sato, S. Shimoda & I. Nakatani

Incremental Bundle Adjustment Techniques Using Networked Overhead And Ground Imagery for Long-Range Autonomous Mars Rover Localization

R. Li, K. Di, J. Wang, S. Agarwal, L. Matthies, A. Howard & R. Willson

Visual Motion Estimation and Terrain Modeling for Planetary Rovers

S. Se, T. Barfoot & P. Jasiobedzki

Session 11b - Environment/Sensor Modelling

Chair: H. Ueno

MOC2DIMES: A Camera Simulator for the Mars Exploration Rover Descent Image Motion Estimation System

R. Willson, A. Johnson & J. Goguen

An Optical Model for Image Artifacts Produced by Dust Particles on Lenses

R. Willson, M. Maimone, A. Johnson & L. Scherr

Camera Response Simulation for Planetary Exploration

R. Madison, M. Pomaerantz & A. Jain

Session 11c - Optimisation Methods

Chair: R. Morris

Game Theory and Co-Evolutive Algorithms for Space Missions Preliminary Design

M. Lavagna, A. Mafficini & A. Ercoli Finzi

Cargo Layout Optimization in Spacecraft: Exploring Heuristics for Branch-and-Bound Method

K. Takadama & K. Shimomura

Posters

Design Optimisation of Controlled Mechanical Structures

P. Kiriazov

Satellite Relative Navigation based on Visual Feedback

M. Abderrahim, J. C. Diaz, M. A. Salichs, F. Gandia & A. Garcia-Casas

EUROBOT: Use of the MUROCO formal approach for Activity Analysis, Programming and Control

L. Joudrier, F. Didot & K. Kapellos

Extension of a Lightweight Formation Control Methodology to Groups of Autonomous Vehicles

G. H. Elkaim & R. J. Kelbley

Robust Distributed Coordination of Heterogeneous Robots through Hierarchical Temporal Plan Networks

A. Wehowsky, S. Block & B. Williams

Planning to Fail: Mission Design for Modular Repairable Robot Teams

S. Stancliff, J. Dolan & A. Trebi-Ollennu

Platform for Robotics Experiments

M. Takata, Y. Wakabayashi & M. Wada

Research of Control Momentum Gyros for Micro-satellites and 3-DOF Attitude Dynamics Simulator Experiments

K. Omagari, T. Usuda & S. Matunaga

Singularity Robust Steering of Redundant Single Gimbal Control Moment Gyros for Small Satellites

H. Okubo & Y. Tani

Development Concept for Space Tethered Autonomous Robotic Satellite I (STARS-I)

M. Nohmi, T. Yamamoto, K. Tanaka, K. Matsushita & H. Yoshihara

Autonomous Smart Robotic Spacecraft/Lander for Landing on Celestial Bodies

S. Li

Intelligent Grasping of an Underactuated Hand for Space Robots

M. Luo & C. Lu

A Computer Vision System for Spaceborne Safety Monitoring

F. Qureshi, D. Macrini, D. Chung, J. Maclean, S. Dickinson & P. Jasiobedzki

Novel Video Encoding Algorithms for Remote Monitoring and Distributed Human-Human Interaction

J. Cooperstock

Simulation of Contact between Complexly Shaped Objects

Y. Gonthier, C. Lange, J. McPhee & J. -C. Piedboeuf
