

SP-610
February 2006

Proceedings of

Fringe 2005 Workshop

28 November – 2 December 2005
Frascati, Italy

European Space Agency
Agence spatiale européenne

SCIENTIFIC COMMITTEE

J. Askne, Chalmers University of Technology (S), R. Bamler, DLR (D),
C. Carnec, BRGM (F), D. Derauw, Centre Spatial de Liege (B),
M. Furuya, University of Tokyo (JP), L. Gray, Canada Centre for Remote Sensing (CDN),
R. Hanssen, Delft University of Technology (NL), K.-A. Høgda, NORUT (N),
J. Hyypä, Finnish Geodetic Institute (FIN), S. Jianbao, China Seismological Bureau (CN),
Paul Lundgren, JPL (US), J. Mallorquí, Universitat Politècnica de Catalunya (Spain),
Erich Meier, University of Zürich (CH), J.J. Mohr, Technical University of Denmark (DK),
A. Monti Guarnieri, Politecnico di Milano (I), A. Moreira, DLR(D),
B. Parsons, University of Oxford (UK), G. Peltzer, University of California Los Angeles (US),
K. S. Rao, Indian Institute of Technology (IN), F. Rocca, Politecnico di Milano (I)
H. Rott, ENVEO (A), J.-C. Souyris, CNES (F),
A Smith, Phoenix Systems (UK),
G. Wadge, University of Reading, UK
Z. Li, The Chinese Academy of Forestry, China

ORGANISING COMMITTEE

M. Engdahl, Y-L. Desnos & B. Rosich – (ESA/ESRIN)
G. Levrini & C.C. Lin (ESA/ESTEC)

Cover image:

Co-seismic Envisat ASAR Wide Swath interferogram of the Bam earthquake in Iran;
(credit: Politecnico di Bari)

Publication: Proceedings of Fringe 2005 Workshop, 28 November – 2 December 2005,
Frascati, Italy, (ESA SP-610, February 2006)

Editor: H. Lacoste
Compiled by: L. Ouwehand

Contents

Foreword

Y.-L. Desnos

Thematic Mapping and DEMs

Chairs: J. Hoffmann & F.M. Seifert

Secretary: T. Pearson

ERS-ENVISAT Cross-Interferometry for Coastal DEM Construction

S.-H. Hong & Joong-Sun Won

Urban DEM

D. Perissin & F. Rocca

On the Generation of a Forest Biomass Map for Northeast China: SAR Interferometric Processing and Development of Classification Algorithm

M. Santoro, O. Cartus, C. Schmullius et al.

Methodology: General

Chairs: R. Bamler & C. Prati

Secretary: B. Rosich Tell

Methods for Atmospheric Correction in INSAR Data

F. Meyer, B. Kampes, R. Bamler & J. Fischer

Improved Resolution Image Focusing by Multi-Pass ENVISAT ASAR Data

G. Fornaro, V. Pascazio, G. Schirinzi & F. Serafino

Multidimensional Imaging with ERS Data

G. Fornaro, F. Lombardini & F. Serafino

Methodology: General

Chairs: R. Hanssen & A. Monti Guarnieri

Secretary: F. Ranera

Scan Pattern Synchronization in Envisat Wide Swath Mode

C. Cafforio, D. D'Aria, P. Guccione et al.

The Potential of Broadband L-Band SAR Systems for Small Scale Ionospheric TEC Mapping
F. Meyer, R. Bamler, N. Jakowski & T. Fritz

Multibaseline Interferometry for Natural Scatterer Characterization
F. De Zan, K. Papathanassiou & F. Rocca

Methodology: Longterm DInSAR

*Chairs: J. Mallorqui & R. Lanari,
Secretary: M. Engdahl*

Advanced DInSAR Based on Coherent Pixels: Development and Results
Using CPT Technique
J. Domínguez, R. Romero, D. Carrasco et al.

Performance Analysis of the SBAS Algorithm for Surface Deformation Retrieval
F. Casu, M. Manzo & R. Lanari

Terrain Motion

*Chairs: A. Arnaud & J. Mallorqui
Secretary: T. Pearson*

Result Evaluation of Coherent Target Model Product with Long-Term
InSAR Data Set in Shanghai
M. Liao, Y. Wang, I. Lu et al.

Derivation of Surface Subsidence Information in Bangkok (Thailand) by PS Analysis
of a Limited Number of Interferograms
J. Worawattanamateekul, J. Hoffmann, R. Bamler et al.

On the Use of Point Target Characteristics in the Estimation of Low Subsidence
Rates Due to Gas Extraction in Groningen, The Netherlands
G. Ketelaar, F. van Leijen, P. Marinkovic & R. Hanssen

**Methodology and Techniques: Advances in PSI
(Persistent Scatterer Interferometry)**

*Chairs: F. Rocca & R. Bamler,
Secretary: M. Engdahl*

The STUN Algorithm for Persistent Scatterer Interferometry
B.M. Kampes & N. Adam

Coherent Scatterers in Urban Areas: Characterisation and Information Extraction
R. Zandona Schneider, K. Papathanassiou, I. Hajnsek & A. Moreira

Spaceborne SAR Anatomy of a City
D. Perissin, A. Ferretti & C. Prati

ERS - ASAR Integration in the Interferometric Point Target Analysis
U. Wegmuller, C. Werner, T. Strozzi, & A. Wiesmann

PSInSAR Validation by Means of a Blind Experiment Using Dihedral Reflectors
G. Savio, A. Ferretti, F. Novali et al.

Parametric Estimation and Model Selection Based on Amplitude-Only Data
in PS-Interferometry
N. Adam, R. Bamler, M. Eineder & B. Kampes

Dissemination of PS-InSAR Results for Improved Interpretation and Analysis
S. Gehlot, E. Verbree & Ramon F. Hanssen

Recursive Persistent Scatterer Interferometry
P. Marinkovic, F. van Leijen, G. Ketelaar & R. Hanssen

A Joint Space-Time Approach to Persistent Scatterer Interferometry
M. Costantini, M. Guglielmi, F. Malvarosa & F. Minati

Volcanoes

Chairs: G. Wadge & P. Lundgren
Secretary: A. Zmuda

Measuring Contemporary Deformation in the Taupo Volcanic Zone, New Zealand,
Using SAR Interferometry
J.K. Hole, A. Hooper, G. Wadge & N.F. Stevens

Ground Deformation Monitoring at the Phlegrean Fields (Naples, Italy) from the
Exploitation of SAR Data in the Framework of CAT-1 and DUP Activities
S. Borgstrom, I. Aquino, C. Del Gaudio et al.

Ice and Snow

Chairs: D. Derauw & J. Mohr
Secretary: M. Eskelinen

Controlled Interferometric Modelling of Glacier Changes in South Svalbard
A.I. Sharov & S.A. Osokin

Application of SAR Interferometry for Himalayan Glaciers
G. Venkataraman, Y.S. Rao & K.S. Rao

The Effects of Basal Water Beneath Vatnajökull, Iceland, on Glacier Sliding Observed
from SAR Interferometry
E. Magnússon, H. Rott, H. Björnsson et al.

Earthquakes and Tectonics

Chairs: P. Lundgren & B. Parsons
Secretary: F. Sarti

Constraining a Viscoelastic Coupling Model of the North Anatolian Fault (NAF)
along the Ganos Segment by Permanent Scatterers
M. Motagh, J. Hoffmann, B. Kampes et al.

Post-Seismic Mantle Relaxation in the Central Nevada Seismic Belt Detected by InSAR: Implication for Basin and Range Dynamics

N. Gourmelen & F. Amelung

Landslides

Chairs: H. Rott & U. Wegmuller

Secretary: F. Palazzo

Application of PSI Technique to Slope Instability Detection in the Daunia Mountains, Italy

F. Bovenga, M.T. Chiaradia, R. Nutricato et al.

Future Missions

Chair: G. Levrini

Secretary: F. Sarti

TanDEM-X: A Satellite Formation for High Resolution SAR Interferometry

G. Krieger, A. Moreira, H. Fiedler et al.

Interferometric Capabilities of ALOS PALSAR and its Utilization

R. Furuta, M. Shimada, T. Tadono & M. Watanabe

Posters

(by Abstract Number)

Optimal Baseline Design and Error Compensation for Bistatic Spaceborne InSAR

W. Wang

Avalanche and Snowfall Monitoring with a Ground-Based Synthetic Aperture Radar

A. Martinez-Vazquez & J. Fortuny-Guasch

The Dynamics of Mining Subsidence in Knurów Area in Poland Derived from SAR Interferometry and Topographic Data

T. Wojciechowski

Surface Effects of the 2004 Indonesian Earthquake and Tsunami from SAR Data

C. Bignami, M. Chini, N. Pierdicca & S. Stramondo

Preliminary Investigation of Zagros Thrust-Fold-Belt Deformation Using SAR Interferometry

F. Nilforoushan, C.J. Talbot & E.J. Fielding

Long Term Monitoring of Unstable Slopes by a Ground Based Synthetic Aperture Radar: A Case Study in Italy

L. Noferini, M. Pieraccini, G. Luzi et al.

Reducing the DEM Error Effect in Differential Interferometry

A. Sowter & M. Warren

A DEM-Free Approach to Persistent Point Scatterer Interferometry

M. Warren, A. Sowter & R. Bingley

Implication of Secondary Geodynamic Phenomena on Co-Seismic Interferometric Coherence

I. Parcharidis, M. Fomelis, E. Lekkas & M. Segou

Measurement of a Small-Scale Subsidence in a Reclaimed Land Using RADARSAT-1 SAR

C.-W. Lee, H.-S. Jung & S.-W. Kim

Relationship Between Piezometric Level and Ground Deformations Measured by Means of DInSAR in the Vega Media of the Segura River (Spain)

R. Tomás, Y. Márquez, J.M. Lopez-Sanchez et al.

Atmospheric Effects Thirty-Five Day on InSAR

J. Leighton, A. Sowter & M. Warren

Detection of Subsidences and Landslides in the North-Bohemian Coal Basin by the InSAR Method

I. Čapková, J. Kianička & L. Halounová,

Space-Adaptive Coherence Estimation

A. Marco, D'Aria Davide & A. Monti Guarnieri

Temporal Variability of Ice Flow on Hofsjökull, Iceland, Observed by ERS SAR Interferometry

F. Müller & H. Rott

Urban Change Detection Using Coherence and Intensity Characteristics of Multi-Temporal ERS-1/2 Imagery

M. Liao, L. Jiang, H.Lin & D. Li

Land Subsidence Monitoring in the Lucca Plain (Central Italy) with ERS-1/2

L. Disperati, S. Viridis, K.L. Feigl & A. Rindinella

Utilizing the CR-Network in Iceland for an Automated Interferometric Processing Chain - Case Study with ERS-Tandem Data

K. Gutjahr, K. Scharrer & U. Münzer

Combining Radar, Optical and GPS Data for Vrancea Seismic Area Analysis

M. Zoran

Application of the Coherent Pixels Technique (CPT) to Large ERS and Envisat SAR Images for Deformation Series Retrieval

J.J. Mallorqui, P. Blanco, J. Sanz-Marcos et al.

Investigations of Nyamuragira and Nyiragongo Volcanoes (Democratic Republic of the Congo) Using InSAR

S. Colclough

A Generic Differential Interferometric SAR Processing System, with Applications to Land Subsidence and Snow-Water Equivalent Retrieval

Y. Larsen, G. Engen, T.R. Lauknes et al.

Contribution of SAR Interferometry (from ERS-1/2) in the Study of the Aeolian Transport Processes: The Cases of Niger, Mauritania and Morocco

C. Bodart, J. Gassani, M. Salmon & A. Ozer

A Comparison of SBAS and PS ERS InSAR for Subsidence Monitoring in Oslo, Norway

T.R. Lauknes, J. Dehls, Y. Larsen et al.

Orbital Single-Pass Interferometry for Vessel Detection and Classification

G. Margarit, J.J. Mallorqui, J.M. Rius et al.

Determination of glacier velocities on King George Island (Antarctica) by DINSAR

A. Moll, M. Braun & A. Lluberias

First Steps Towards Single-Pass Interferometry Based on a Bistatic Fixed Receiver SAR System

J. Sanz-Marcos, J.J. Mallorqui, A. Aguasca et al.

Spatio-Temporal Phase Unwrapping Using Integer Least-Squares

F.J. van Leijen, R.F. Hanssen, P.S. Marinkovic & B.M. Kampes

The Interpretation of Bam Fault Kinematics Using Envisat SAR Interferometric Data

Z. Perski & R. Hanssen

Preliminary Results of Differential Interferometry in West-Central Argentina

P.A. Euillades, B. Brooks, M. Blanco & L. Euillades

Key Points in InSAR Process to Measure Surface Deformation in Cangzhou

L. Gong, J. Zhang & Q. Guo

Subsidence Revealed by PSInSAR Technique in the Ottignies-Wavre Area (Belgium) Related to Water Pumping in Urban Area

P.-Y. Declercq, X. Devleeschouwer & F. Pouriel

Using DInSAR to Monitor Subsidence Caused by Underground Mining Utilising Block-Caving Method.

A. Jarosz

Application of PSI Techniques to Landslide Investigations in the Caramanico Area (Italy): Lessons Learnt

J. Wasowski, F. Bovenga, D. Casarano et al.

A Data Fusion Technique for Mosaicking of Different Sources
Digital Elevation Models
M. Costantini, F. Malvarosa, F. Minati, et al.

Monitoring Long-Term Ground Movements and Deep Seated Gravitational
Slope Deformations by InSAR Time Series: Cases Studies in Italy
S. Stramondo, M. Saroli, M. Moro et al.

A Generalized New Algorithm for the Evaluation of Textural Parameters of Order N
N. Talla Tankam, A. Akono, A. Dipanda et al.
