

**SP-617**  
July 2006

*Proceedings of*

**SOHO-17**

**10 Years of SOHO and Beyond**

7 – 12 May 2006  
Giardini Naxos, Sicily, Italy

**European Space Agency**  
**Agence spatiale européenne**

# CONTENTS

## Foreword

### **Session 1: Solar Interior: from Exploration to Experimentation**

*Chairs: M. Thompson & M.P. Di Mauro*

Helioseismological Determination of the State of the Solar Interior

*D. Gough*

Recent Progresses on g-Mode Search

*T. Appourchaux, B. Andersen, F. Baudin et al.*

Detection of the Periodic Signatures of  $l = 1$  Solar g Modes with 10 Years of GOLF/SOHO Data

*R.A. García, S. Turck-Chièze, S.J. Jiménez-Reyes et al.*

Resonant Oscillation Modes and Background in Realistic Hydrodynamical Simulations of Solar Surface Convection

*T. Straus, G. Severino & M. Steffen*

### **Session 2: Magnetic Variability: From the Tachocline to the Heliosphere**

*Chairs: J.-C. Vial & S. Gregory*

Probing Convection and Solar Activity with Local Helioseismology

*L. Gizon*

Does Visibility Effect Fully Explain Cycle Variations of Coronal Bright Points?

*I. Sattarov, A.A. Pevtsov, N.V. Karachik & C.T. Sheridanov*

On the Solar Wind Elemental Composition: Constraints on the Origin of the Solar Wind

*T.H. Zurbuchen & R. von Steiger*

## **Session 3: Atmospheric Heating and Solar Wind Origin: MHD vs. Plasma Physics**

*Chairs: R. Walsh, & F. Reale*

Heating of the Magnetically Closed Corona

*J.A. Klimchuk, M.C. López Fuentes & C.R. DeVore*

New Models of the Solar Chromosphere and Transition Region Determined  
from SUMER Observations

*E.H. Avrett*

First VUV Sun-As-A-Star Spectrum Compared to Other Cool Stars

*H. Peter*

Heating of the Solar Corona: Modeling the EUV/X-ray Emission

*D.H. Brooks & H.P. Warren*

Plasma Diagnostics of the Large-Scale Corona with SUMER

*E. Landi, U. Feldman & G.A. Doschek*

Empirical Solar Wind Forecasting from the Chromosphere

*R. Leamon & S.W. McIntosh*

Diagnostics and Modelling of the Solar Wind Source Regions

*G. Poletto*

Coronal Hole Properties During the First Decade of UVCS/SOHO

*M.P. Miralles, S.R. Cranmer & J.L. Kohl*

Properties of Plasma Dynamics In The Polar Coronal Plumes

*N.-E. Raouafi, J.W. Harvey & S.K. Solanki*

Slow Coronal Wind Composition

*L. Abbo, E. Antonucci, M.A. Dodero et al.*

Observations of Solar Wind Ni and Fe

*F. Ipavich, P. Bochsler, J. Paquette & S. Lasley*

## **Session 4a: Solar Variability and its Effects on the Heliosphere and the Earth**

*Chairs: L. Strachan & C. St. Cyr*

The Helioseismic Sources Observed in the Proton-Rich Flare of October 28, 2003

*V.V. Zharkova & S.I. Zharkov*

Photospheric Field Evolution in the Source Regions of Coronal Mass Ejections

*V. Bothmer & D. Tripathi*

10 Years of CME Onset Studies with SOHO/CDS

*D. Bewsher & R.A. Harrison*

SOHO Contributions to Understanding CMEs

*G.M. Simnett*

Detections of CME-Driven Shocks with LASCO

*A. Vourlidas*

## **Session 4b: Solar Variability and its Effects on the Heliosphere and the Earth**

*Chairs: H. Peter & E. Antonucci*

SOHO UVCS and Mauna Loa Mark IV Observations of a Slow CME below 2 Solar Radii

*A. Bemporad, G. Poletto & J.C. Raymond*

Progress Toward Measurements of Suprathermal Tails in Coronal Proton Velocity Distributions

*J. Kohl, A.V. Panasyuk, S.R. Cranmer et al.*

Electron Acceleration in Turbulent Coronal Loops by Kinetic Alfvén Waves

*N. Décamp & F. Malara*

Energetic Particles Measured by the Costep Experiment during the Last Solar Magnetic Field Polarity Reversal

*J.R.-Pacheco, J.J. Blanco, J. Sequeiros et al.*

## **Session 5: SOHO and the Solar System**

*Chair: E. Antonucci*

Helium/Hydrogen Fractionation in the Solar Wind – How Much is Due to Inefficient Coulomb Drag?

*P. Bochsler, F. Auchère & R.M. Skoug*

## **Session 6: The SOHO Roller-Coaster: Mission History and Personal Memories**

*Chairs: B. Fleck & J. Gurman*

Saving SOHO

*F.C. Vandenbussche*

SOHO, What Happened After 1999?

*T. van Overbeek*

SOHO in Venice

*M.C.E. Huber*

How to See Northern Lights Through the Clouds in England

*G. Del Zanna*

## **Session 7: From SOHO to ILWS and Beyond: Visions for Solar Research from Space**

*Chairs: D. Spadaro*

On the Long-Term Future of Solar and Heliospheric Physics

*C.J. Schrijver*

Solar Microscopy: Unveiling the Sun's Basic Physical Processes at their Intrinsic Scales

*S.K. Solanki & E. Marsch*

A Very High Resolution Vision for Solar Physics: Interferometry & Spectral-Imaging in the Far Ultraviolet

*L. Damé*

## Posters

### **Solar interior: from Exploration to Experimentation**

Seismic Determination of Solar Heavy Element Abundances

*S. Basu & H.M. Antia*

Helioseismic Constraints on the Time Evolution of the Fine Structure Constant

*A. Bonanno & H. Schlattl*

Sensitivity of Solar F-Mode Travel Times to Internal Flows

*J. Jackiewicz, L. Gizon & A.C. Birch*

Dynamics of the Solar Radiative Zone: Present and Future

*S. Turck-Chièze*

The Influence on the 22-Year Solar Cycle of Multicellular Meridional Flows

*L. Jouve & A.S Brun*

MDI and GONG Inferences of the Changing Sun

*O. Burtseva, I. González Hernández, F. Hill et al.*

Divergence and Vorticity of Subsurface Flows Derived from Ring-Diagram Analysis of MDI and GONG Data

*R. Komm, R. Howe, F. Hill et al.*

Helioseismic Measurements of Solar Radius Changes from SOHO/MDI

*S. Lefebvre, A.G. Kosovichev & J.P. Rozelot*

Examining the Effect of the New Chemical Composition on the Solar Structure by Using the Adiabatic Gradient

*C.-H. Lin, H.M. Antia & S. Basu*

The Role of Kinetic Helicity in Spherical Shell Dynamos

*P.W. Livermore, D.W. Hughes & S.M. Tobias*

The Interplay Between Complex Pattern Formation and Global Dynamics of the Solar Photosphere

*A. Vecchio, V. Carbone, F. Lepreti et al.*

The Solar Neon Abundance and the Standard Solar Model

*P.R. Young*

On the Choice of Phase-Speed Filters For Helioseismic Travel-Time Measurements

*S. Zharkov, J.M. Jensen & M.J. Thompson*

### **Magnetic Variability: from the Tachocline to the Heliosphere**

Temporal Variation in the Solar Rotation Rate During the Last One Decade

*S. Basu & H.M. Antia*

Asphericity and Time Variation of the Near-Surface Layers of the Sun

*S. Basu, H.M. Antia & R.S. Bogart*

High Resolution Observations of Emerging Active Regions Carried Out at the THEMIS Telescope

*V. Battiato, S. Billotta, L. Contarino et al.*

On Linear and Nonlinear Analysis of Jet and Current Sheet Interactions in the Solar System: 2D Hybrid Compact Shock Capturing Simulations

*L. Bettarini, S. Landi, P. Londrillo & M. Velli*

Numerical Simulations of Rotating Sunspots

*G.J.J. Botha, A.M. Rucklidge, F.H. Busse & N.E. Hurlburt*

The Solar Internal Magnetism: Putting together More Pieces of the Puzzle

*A.S. Brun & L. Jouve*

Solar Photospheric Magnetic Elements Dimension and Radiance

*I. Cabello & V. Domingo*

The Transition Region Above Sunspots

*W. Curdt & E. Landi*

Simulation of Active Region Coronal Loops EUV Emission

*J. Dudík, E. Džifčáková, M. Karlický et al.*

Review of the Long-Term Performance of the PMO6 Radiometers on VIRGO/SOHO

*W. Finsterle, C. Fröhlich & U. Schlifkowitz*

Searching for Common Mid-Term Variations in Different Aspects of Solar Activity

*E. Forgács-Dajka & T. Borkovits*

Total Solar Irradiance Variability: What Have We Learned from SOHO/VIRGO about Solar Cycle 23?

*C. Fröhlich*

Relationships Between Photospheric Magnetic Field Structure, Heliospheric & Geomagnetic Characteristics

*E.A. Gavryuseva*

Rotation of the Extended Solar Corona from SOHO/UVCS Observations

*S. Giordano, S. Mancuso, A. Cora & C. Benna*

Prominence Parameters Derived from Hydrogen Lyman- $\alpha$  Spectral Profiles Measured by SOHO/SUMER

*S. Gunár, L. Teriaca, P. Heinzel & U. Schühle*

Moving Magnetic Features Observed in Photosphere, Chromosphere, and Transition Region

*H.J. Hagenaar & Z.A. Frank*

What We Have Learned about Prominences and Filaments from SOHO/SUMER and CDS Spectral Observations

*P. Heinzel, B. Schmieder & J.-C. Vial*

Darkening of Coronal Lines by Limb Prominences Observed by SOHO/SUMER

*I.E. Dammasch, P. Heinzel & U. Anzer*

On the Origin of Current Helicity in Active Regions

*K. Petrovay, P. Chatterjee & A. Choudhuri*

Multi-Wavelength Observations with High Resolution of a M5.4 Flare from Ground and Space

*A. Kučera, H. Wöhl, J. Rybák et al.*

Analysis of a Relation between Subphotospheric Plasma Flows and Photospheric Current Kernels

*A. Kulinová, E. Dzifčáková, A.G. Kosovichev & T.L. Duvall*

On the Origin of “Unipolar” Magnetic Flux Emergence: The Emergence you See is not the True Emergence

*D.A. Lamb & C.E. Deforest*

Anisotropic Momentum Transport in the Tachocline

*N. Leprovost & E.-j. Kim*

Net Circular Polarization of Sunspot Penumbrae - A Versatile Tool for Diagnosing Magnetic Field Structure

*D.A.N. Müller, R. Schlichenmaier, G. Fritz & C. Beck*

Sound Wave Travel Times in Plage Areas - The Effect of Abnormal Granulation

*K. Petrovay, R. Erdélyi & M.J. Thompson*

Magnetic Variability of the Streamer Belt

*F. Saez, P. Lamy & A. Llebaria*

Importance of Absorption and Volume Blocking for Line Intensity Depression in EUV Filaments

*P. Schwartz, B. Schmieder & P. Heinzel*

Numerical Simulations of Slow Standing Waves in a Curved Solar Coronal Loop

*M. Selwa & K. Murawski*

The Dynamic Nature of the Lower Transition Region as Revealed by Spectroscopy of the Hydrogen Lyman- $\alpha$  Line.

*L. Teriaca, U. Schühle, S.K. Solanki et al.*

The Dynamics and Structure of the Solar Atmosphere As Obtained from Combined SUMER/SOHO and TIP2/VTT Observations

*L. Teriaca, A. Lagg, R. Aznar Cuadrado et al.*

Study of a Small-Scale Eruptive Event Observed by SOHO/SUMER

*F. Tomasz, S. Régnier, P. Schwartz et al.*

Solar Cycle Contrast Changes as Seen in EUV Transition Region Lines

*W.T. Thompson*

## **Atmospheric Heating and Solar Wind Origin: MHD vs. Plasma Physics**

Seismology of Coronal Loops Using the Period and Damping of Quasi-Mode Kink Oscillations

*I. Arregui, J. Andries, T. Van Doorselaere et al.*

Rotational Tomography of the Solar Corona – Calculation of the Electron Density and Temperature

*N. Barbey, F. Auchère, T. Rodet et al.*

Off-Limb Coronal Loop Dynamics as Seen from CDS, EIT and TRACE

*D. Banerjee, E. O'shea & J.G. Doyle*

Coronal Studies During a Solar Cycle with Synoptic Maps from SOHO/UVCS Observations  
*C. Benna, S. Mancuso, S. Giordano et al.*

On the Possibility of Detecting Small-Scale Reconnection Jets in the Solar Corona  
*M.J. West & P.J. Cargill*

SOHO/CDS Observations of Quiescent Active Region Loops.  
*G. Del Zanna, H.E. Mason & J. Cirtain*

SOHO Observations of Polar Coronal Jets over the Last Solar Cycle  
*D. Dobrzycka, J. Raymond, E. DeLuca et al.*

X-Ray Diagnostics of the Non-Thermal Electron Distribution  
*E. Dzifčáková & A. Kulinová*

The Modification of Chianti for the Computation of Synthetic Emission Spectra  
for the Electron Non-Thermal Distributions  
*E. Dzifčáková*

Comparisons of H I Ly-Alpha Line Widths in Streamers and Coronal Holes  
Measured with UVCS/SOHO and UVCS/Spartan-201 in November 1998  
*L.D. Gardner, M.-P. Miralles, A. Panasyuk et al.*

Chromospheric and Transition Regions Features in Solar Like Stars  
*I. Pagano, C. De Martino, A.F. Lanza et al.*

Preferential Perpendicular Heating of Coronal Hole Minor Ions by the Fermi Mechanism  
*P.A. Isenberg & B.J. Vasquez*

The Lyman  $\alpha$  and Lyman  $\beta$  Lines in Solar Coronal Streamers  
*N. Labrosse, X. Li & B. Li*

The In-Flight Monitoring and Validation of the CDS NIS Radiometric Calibration  
*J. Lang, D.H. Brooks, A. Lanzafame et al.*

A Dynamical Model for the Spatio-Temporal Intermittency of the Turbulent Energy Cascade:  
First Results and Possible Applications To Coronal Loops  
*F. Lepreti, V. Carbone & P. Veltri*

Angular Momentum Transport and Proton-Alpha Differential Streaming in the  
Low-Latitude Fast Solar Wind  
*B. Li & X. Li*

The Signature of Moving Magnetic Feature in the Solar Atmosphere  
*C.-H. Lin, D. Banerjee, E. O'Shea & J.G. Doyle*

Assessing the Properties of the Global Magnetic Field in the Outer Corona  
*S. Mancuso & M.V. Garzelli*

Plasma Outflows and Open Magnetic Fields in a Quiet-Sun Region  
*C.-Y. Tu, J.-S. He & E. Marsch*

On the Structure of the Solar Transition Region  
*E. Marsch, G.-Q. Zhou, J.-S. He & C.-Y. Tu*

On the Role of the Parallel Proton Fire Hose Instability in the Expanding Solar Wind:  
Simulations and Observations

*L. Matteini, S. Landi, P. Hellinger et al.*

Three-Dimensional MHD Models of Waves in Active Regions:  
Application to Coronal Seismology

*J.A. McLaughlin & L. Ofman*

Drift-Instabilities in a Coronal Funnel Within the Multi-Fluid Description

*R. Mecheri & E. Marsch*

Looking for Signature of Coronal Heating in the Radiative Emission of a Coronal Loop

*S. Parenti, E. Buchlin, P.J. Cargill et al.*

Large Temperature Anisotropies in Polar Coronal Holes: How Reliable are they?

*N.-E. Raouafi & S.K. Solanki*

Diagnostics of Coronal Loops from Multi-Band Observations

*F. Reale & A. Ciaravella*

The Solar Cycle as Seen from the SOHO/UVCS White Light Channel

*M. Romoli, S. Giordano & C. Benna*

Comparison of UVCS/SOHO Streamer Properties with 1 AU Solar Wind Measurements

*L. Strachan, A.V. Panasyuk, M.P. Miralles & J.L. Kohl*

Spectroscopic Observations of the Extended Solar Corona Above Quiet Sun Regions

*R.M. Suleiman, J.L. Kohl, L. Strachan et al.*

O VI Kinetic Temperature and Outflow Velocity in Solar Corona Beyond  $3R_{\odot}$

*D. Telloni, E. Antonucci & M.A. Dodero*

MHD Versus Kinetic Effects in the Solar Coronal Heating: A Two-Stage Mechanism

*. Tsiklauri*

H $\alpha$  Chromospheric Mottles and their UV/EUV Counterparts Seen by SOHO/Sumer

*K. Tziotziou, P. Heinzel, G. Tsiropoula & U. Schühle*

Time Dependent Simulations of 2D Coronal Loop Models

*T. Van Doorselaere, S. Poedts, J. Andries & I. Arregui*

Oxygen Abundance Variations in Coronal Streamers Affected by CMES

*A.M. Vásquez & J.C. Raymond*

Alfvén Waves and Turbulence in the Inner Corona

*A. Verdini, E. Buchlin & M. Velli*

Ion Sound in Highly Collisional, Partially Ionized Plasma

*J. Vranjes & S. Poedts*

Determining Solar Plasma Loop Thermal Structure: Pros and Cons of an EUV  
Colour-Colour Method

*J.B. Nogliki & R.W. Walsh*

Hydrodynamic Simulations of Dynamic Heating within a Bundle of Solar  
Atmospheric Plasma Strands

*A. Sarkar & R.W. Walsh*

## **Solar Variability and its Effects on the Heliosphere and the Earth**

The Marseille-Artemis Catalog of LASCO CMES

*Y. Boursier, P. Lamy, A. Llebaria & S. Robelus*

CME Modeling: An a Posteriori Approach

*E. Chané, S. Poedts & B. Van der Holst*

Asymmetric Prominence Eruption: A “Domino Effect”?

*C. Chifor, H.E. Mason, D. Tripathi et al.*

Fractal Properties of Solar Eruptions and Interplanetary Magnetic Fields in Geomagnetic Events

*T.D. Cheung, D.E. Cotten, P.J. Marchese et al.*

Revealing the Inside of Coronal Mass Ejections

*H. Cremades, O.C. St. Cyr & G. Stenborg*

The EUV Spectral Irradiance and the Physical Characteristics of the Solar Corona During the 10 Years of SOHO Measurements

*G. Del Zanna & V. Andretta*

On the Effect of the Background Solar Wind on CME's Initiated by Flux Emergence

*G. Dubey, S. Poedts, B. Van Der Holst & M. Gryp*

On the Spectral Components of the June 2000 Solar Energetic Particle Events

*J. Torsti, J. Laivola, P. Mäkelä et al.*

Reverse Drift Bursts in the 0.8-4.5 GHz Band and their Relation to X-rays

*F. Fárnik & M. Karlický*

SOHO/COSTEP Observations of the November 1, 2004 Solar Energetic Particle Event

*R. Gómez-Herrero, A. Klassen, R Müller-Mellin et al.*

Observational Properties of CMEs from a Decade-Long Observations by SOHO

*N. Gopalswamy, S. Yashiro & R.A. Howard*

Comparison of SOHO and Debrecen Photoheliographic Data Sunspot Areas for the Years 1996 and 1997

*L. Györi & T. Baranyi*

Modulation of Velocity Dispersion of Solar Energetic Particles by Pre-Event Background

*K. Huttunen-Heikinmaa, E. Valtonen & T. Laitinen*

Microflares and Loop Oscillations

*D.E. Innes, T.J. Wang, S.K. Solanki & D. Tothova*

COSTEP/SOHO Observations of Energetic Electrons Far Upstream of the Earth's Bow-Shock

*A. Klassen, R. Gómez-Herrero, E. Böhm et al.*

The Helium Spectrum in Moving Solar Prominences

*N. Labrosse, P. Gouttebroze & J.-C. Vial*

Interaction of CMEs with the Streamer Belt
