

SP-624

October 2006

SOHO 18/GONG 2006/HELAS I

Beyond the spherical Sun

7-11 August 2006
Sheffield, UK

European Space Agency
Agence spatiale européenne

Scientific Organising Committee

Michael Thompson (Chair)	University of Sheffield, UK
Bo Andersen	Norwegian Space Centre, Norway
Annie Baglin	Observatoire de Paris-Meudon, France
Sarbani Basu	Yale University, USA
Paul Cally	Monash University, Australia
Yvonne Elsworth	University of Birmingham, UK
Bernhard Fleck	ESA Space Science Department, USA
Douglas Gough	University of Cambridge, UK
Hans Kjeldsen	Aarhus University, Denmark
Don Kurtz	University of Central Lancashire, UK
John Leibacher	National Solar Observatory, USA
Pere Pallé	Instituto de Astrofísica de Canarias, Spain
Phil Scherrer	Stanford University, USA
Hiroto Shibahashi	University of Tokyo, Japan
Sylvaine Turck-Chièze	Service d'Astrophysique / DAPNIA, France

Local Organising Committee

Michael Thompson (Chair)	University of Sheffield
Robert Erdélyi	University of Sheffield
Rekha Jain	University of Sheffield
Roger New	Sheffield Hallam University

Publication: Proceedings, SOHO 18/GONG 2006/HELAS I
Beyond the spherical Sun
Noordwijk, The Netherlands
(ESA SP-624, October 2006)

Editor: Karen Fletcher

Scientific Editor: Michael Thompson

CONTENTS

Introduction and welcome

Chair: B Fleck

Various dynamical puzzle pieces in the seismic Rubik's cube
J Toomre

Session 1

Local methodologies

Chair: B Fleck

Local helioseismology: techniques and issues
A C Birch

Farside helioseismic holography: recent advances
I González Hernández, F Hill, C Lindsey, D Braun, P Scherrer, S M Hanasoge

Magnetoseismic signatures of active regions and the question of rapid downflows beneath sunspots
C Lindsey

Observed and simulated photospheric velocities within inclined magnetic fields
H Schunker, P Cally

Session 2

Temporal variations and flows

Chair: M Roth

Seismic results on temporal variation of the solar interior
R Howe

Toward improving the seismic visibility of the solar tachocline
S M Jefferies, S V Vorontsov, C Giebink

The seismic Sun over three activity cycles
W J Chaplin, Y Elsworth, S J Hale, B A Miller, G A Verner, R New

Cyclic variability of the seismic solar radius from SOHO/MDI and related physics
S Lefebvre, A G Kosovichev, P Nghiem, S Turck-Chièze, and J P Rozelot

Interior structures and flows beneath sunspots from time-distance helioseismology
J Zhao

Subsurface convective flows within active regions
B W Hindman, D A Haber, J Toomre

Session 2 (continued)

Chair: P Cally

Consequences of large-scale flows around active regions on the dispersal of magnetic field across the solar surface

M L DeRosa, C J Schrijver

Effect of the subsurface shear layer on solar supergranulation

C A Green, A G Kosovichev, M S Miesch

Effect of sunspot structure from p-modes scattering

M Gordovskyy, R Jain, M J Thompson

Session 3

Seismology above the photosphere

Chair: P Cally

Magnetic seismology of the lower solar atmosphere

R Erdélyi

Low-frequency magneto-acoustic waves in the solar chromosphere

S M Jefferies, S W McIntosh, J D Armstrong, T J Bogdan, A Cacciani, B Fleck

Session 4

Modelling the solar interior

Chair: R Komm

Reconciling the revised solar abundances with helioseismic constraints

J A Guzik

Non-kinematic flux-transport dynamos and torsional oscillations

M Rempel

Solar evolution model with diffusion and new equation of state

S V Ayukov, V A Baturin, A B Gorshkov

Molecular-dynamics simulations of hot dense Coulomb systems

K Mussack, D Mao, W Däppen

Session 5

Low-degree seismology from the Sun to the stars

Chair: D O Gough

Helioseismology with low-degree observations: where we stand, and what the future holds

W J Chaplin

The internal structure of the Sun inferred from g modes and low-frequency p modes

Y P Elsworth et al.

Detection of periodic signatures in the solar power spectrum On the track of $l=1$ gravity modes
R A García, S Turck-Chièze, S J Jiménez-Reyes, J Ballot, P L Pallé, A Eff-Darwich, S Mathur, J Provost

The DynaMICS perspective
S Turck-Chièze et al.

Observations of solar-like oscillations
T Bedding, H Kjeldsen

Rigorous analysis of dipolar oscillations of stars
M Takata

Frequency, splitting, linewidth and amplitude estimates of low- l p modes of alpha Cen A: analysis of WIRE photometry
S T Fletcher, W J Chaplin, Y Elsworth, J Schou, D Buzasi

Session 6

Mode physics

Chair: H Kjeldsen

Stochastic excitation and damping of solar-like oscillations
G Houdek

Energetic effects in classical pulsators
M-A Dupret, A Grigahcène, S Théado, P-O Bourge, M Gabriel

Session 7

A new era of asteroseismology

Chair: H Kjeldsen

Studying solar-like oscillations in red giants: MOST spacebased photometry of epsilon Ophiuchi
C Barban et al.

Modelling intermediate mass red giants
O Moreira, A Noels, M-A Dupret

Session 7 (continued)

Chair: S Basu

Asteroseismology of hot B subdwarf stars: a brief overview
G Fontaine, P Brassard, S Charpinet, E M Green, P Chayer, S Randall, B Dorman

Observations of magneto-acoustic modes in strongly magnetic pulsating roAp stars
D W Kurtz, V G Elkin, G Mathys

The seismology programme of the CoRoT space mission
A Baglin, E Michel, M Auvergne, and the CoRoT team

Session 8

Dynamics and numerical simulation

Chair: F Hill

Asteroseismology of exoplanets-host stars

S Vauclair

Dynamical processes in stellar radiation zones: secular magnetohydrodynamics of rotating stars

S Mathis, T Decressin, A Palacios, L Siess, C Charbonnel, S Turck-Chièze, J-P Zahn

Internal gravity waves in the Sun

S Talon

Dynamical processes in the solar radiative interior

A Palacios, S Talon, S Turck-Chièze, C Charbonnel

Suppression of amplitude of 5-min oscillations in sunspots due to the lack of acoustic sources

K Parchevsky, A Kosovichev

Solar acoustic simulator

S M Hanasoge, T L Duvall

Prospects for helio- and asteroseismology

J Christensen-Dalsgaard

Poster Papers

P1 Optimal phase-speed filters in time-distance helioseismology

S Couvidat, A C Birch

P2 Sensitivity kernels for helioseismic travel times in spherical geometry – preliminary results

M Roth, L Gizon, A C Birch

P3 Acoustic scattering by flux tubes: is the Born approximation valid?

L Gizon, S M Hanasoge, A C Birch

P4 Large-scale circulations using ring analysis

D Haber, B Hindman, J Toomre, R S Bogart

P6 The group velocity of solar p modes

S V Vorontsov

P8 Temporal variations of travel-time differences from GONG++

S Kholikov, J Leibacher

P10 Correcting Dopplergrams for solar active regions: consequences for local helioseismology

R Wachter, S P Rajaguru, R S Bogart

P11 Effects of horizontal magnetic fields on acoustic travel-times

R Jain

- P12 Dynamics study of solar oscillations and granulation with THÉMIS observations
R Simoniello, S J Jiménez Reyes
- P13 Inferring subsurface supergranular flow directly from helioseismic correlation data
M F Woodard
- P14 f-mode sensitivity kernels for flows
J Jackiewicz, L Gizon, A Birch
- P15 Subsurface flows measured with big rings
R Komm, I González Hernández, R Howe, F Hill
- P16 Subsurface flows from numerical simulations compared with flows from ring analysis
S Ustyugov, R Komm, O Burtseva, R Howe, S Kholikov
- P18 B_0 -angle effect on zonal and meridional flow determinations from 3 years ring diagram analysis of GONG++ data
A Zatri, R Komm, I González Hernández, R Howe, T Corbard
- P22 Solar rotation and zonal flows from Mount Wilson 60 ft tower data
R Howe, R Bogart, J Christensen-Dalsgaard, E J Rhodes Jr, P Rose, J Schou
- P23 Meridional flow measurements with statistical waveform analysis
U Mitra-Kraev, M J Thompson, M F Woodard
- P24 Examining possible errors in the inversion results of active regions through a model study
C-H Lin, L Li, S Basu
- P25 Acoustic power and magnetic field orientation in a large sunspot
S Gosain, P Venkatakrishnan, K Venugopalan
- P26 The cookie cutter test for time-distance tomography of active regions
S G Korzennik
- P27 Comparative study of isolated sunspots using time-distance helioseismology
S Zharkov, C J Nicholas, M J Thompson
- P28 Subsurface structure evolution associated with the rise and fall of intensely active regions
R S Bogart, S Basu, M C Rabello-Soares, H M Antia
- P29 Three-dimensional numerical simulation of wave propagation through a model sunspot
R Cameron, L Gizon
- P30 Magnetic field inclination and atmospheric oscillations above solar active regions: theory
P S Cally, H Schunker
- P31 On the enhanced velocity oscillations observed during solar flares
B Kumar, P Venkatakrishnan, K Venugopalan
- P33 The acoustically active solar flare of 2005 January 15
H Moradi, A-C Donea, C Lindsey, D Besliu-Ionescu, P S Cally

- P34 Seismic emission from M-class solar flares
D Besliu-Ionescu, A-C Donea, P Cally, C Lindsey
- P35 Peak parameter shifts from large-aperture ring diagram analysis
R Howe, I González Hernández, F Hill, R Komm
- P36 Phenomenological simulation of the total solar irradiance and its power spectrum
H Vázquez Ramió, C Régulo, T Roca Cortés
- P37 Solar mean magnetic field near the surface and its variation during a cycle
P A P Nghiem, R A García, S J Jiménez-Reyes
- P38 High-degree mode frequencies: changes with solar cycle
M C Rabello-Soares, S G Korzennik, J Schou
- P39 Helioseismic modes in a magnetic atmospheric solar model
B Pintér, R Erdélyi
- P40 Hydrodynamic evolution of the solar tachocline
S Talon
- P41 How magnetic is the solar tachocline?
R Arlt, A Sule, G Rüdiger
- P42 MHD turbulence on a β -plane
N Leprovost, E-J Kim
- P43 Turbulent transport in the solar interior
E-J Kim, N Leprovost
- P44 Convection and non-axisymmetric large-scale flows at the base of the solar convection zone
E Tikhomolov
- P45 A non-local MLT treatment fitting 3D simulations
M-A Dupret, M-J Goupil, R Samadi, A Grigahcène, M Gabriel
- P46 Supergranule scale convection simulations
R F Stein, D Benson, D Georgobiani, Å Nordlund
- P47 Seismic estimate of solar heavy element abundances
S Basu, H M Antia
- P48 A seismic solar model with the updated elemental abundances
H Shibahashi, S Tamura
- P49 Rotation inversions of artificial solarFLAG Sun-as-a-star data
W J Chaplin et al.
- P50 Coupling of high-degree solar p modes by differential rotation
S V Vorontsov

- P51 On the direct determination of sensitivity, resolution and information content of helioseismic data – application to the inversion of the solar core rotation rate
A Eff-Darwich, S G Korzennik, S J Jiménez-Reyes, R A García
- P52 Evolutionary convective envelope in modern model of the Sun
V A Baturin
- P53 A new method to estimate the acoustic cut-off frequency of the Sun using the different properties between p-modes and pseudomodes of low degree
A Jiménez, S J Jiménez-Reyes, R A García
- P54 Examining the effect of the new chemical composition on solar structure by using the adiabatic index
C-H Lin, H M Antia, S Basu
- P55 On seismic signatures of rapid variation
G Houdek, D O Gough
- P56 How GOLF sees the second helium ionization layer across the solar cycle
J Ballot, S J Jiménez-Reyes, R A García
- P57 Solar-cycle variations in p-mode frequencies and even-order splitting coefficients from LOWL observations
D Salabert, S J Jiménez-Reyes
- P58 Are the shapes of the p-mode peaks ‘distorted’ by the solar cycle when they are observed in long, multi-year power frequency spectra?
W J Chaplin, Y Elsworth, R New, T Toutain
- P59 How does the change on solar abundances affect low degree modes?
A Zatri, J Provost, G Berthomieu, P Morel, T Corbard
- P61 Changes to global mode parameters over a solar cycle
S C Tripathy, F Hill, K Jain, J W Leibacher
- P62 Comparison of the solar velocity spectrum from MDI and GOLF during cycle 23
S Lefebvre, R A García, S J Jiménez-Reyes, S Turck-Chièze
- P63 Sensitivity of the predicted frequencies of $l = 1$ gravity modes to known physical processes
S Mathur, S Turck-Chièze, S Couvidat, R A Garcia
- P64 Needles in haystacks: how to use contemporaneous data in the search for g-modes
A M Broomhall, W J Chaplin, Y Elsworth
- P65 Theoretical damping rates and phase-lags for solar-like oscillations
M A Dupret, C Barban, M-J Goupil, R Samadi, A Grigahcène, M Gabriel
- P66 Solar-activity changes in the p-mode damping and excitation observed in LOWL data
D Salabert, S J Jiménez-Reyes

- P68 BiSON update
J Allison et al.
- P69 Analysis of velocity-noise variations arising from photon-noise in data from the GOLF instrument
R New, W J Chaplin, Y P Elsworth, R A García, S J Jiménez-Reyes
- P70 Reliable analysis of power and phase features as seen from BiSON and GOLF observations
R Simoniello, Y P Elsworth, W J Chaplin, R García
- P71 Comparison of solar p-mode lifetimes from GONG, MDI and TON data
O Burtseva, S Kholikov, F Hill, J Bolding, O Ladenkov, D-Y Chou
- P72 A comparison of acoustic mode parameters using multi-spectral data
K Jain et al.
- P73 Comparison of local frequency shifts between MDI velocity and intensity data
S C Tripathy, H M Antia, F Hill, K Jain, I González Hernández et al.
- P75 High resolution spectrum: towards a new observational strategy
N Seghouani
- P76 Study of the role of phase evolution in the amplitudes of low-degree solar p-modes
R Simoniello, W J Chaplin, Y Elsworth, R New
- P78 The effects of rotation on frequency of stellar oscillations
K D Burke, M J Thompson
- P79 On the possible existence of localised vacillating convection state in rapidly rotating young solar-like stars
J Ballot, A S Brun, S Turck-Chièze
- P80 Asteroseismic diagnostics of stellar convective cores
A Mazumdar, S Basu, B L Collier, P Demarque
- P81 Kepler telescope and solar-like pulsators
J Molenda-Zakowicz, T Arentoft, H Kjeldsen, A Bonanno
- P82 Calibrating the solar dynamo: magnetic activity cycles of southern Sun-like stars
T S Metcalfe, T J Henry, M Knölker, D R Soderblom
- P83 On the prospects for sounding activity cycles on Sun-like stars
W J Chaplin, Y Elsworth, G Houdek, R New
- P84 Evidence for degree dependence of changes in p-mode damping along the solar cycle in Sun-as-a-star data
D Salabert, W J Chaplin, Y Elsworth, R New, G A Verner
- P85 The complementary roles of interferometry and asteroseismology
O L Creevey, M J P F G Monteiro, T S Metcalfe, T M Brown
- P86 12 Bootis: the need for asteroseismic constraints
A Miglio, J Montalbán, C Maceroni, J De Ridder, F D'Antona
