

CONTENTS

Foreword

Methodology and Techniques: General

Chairs: D. Perissin & M. Costantini

Secretary: M. Lavallo

ERS-2 Zero-Gyro-Mode Data Application Showcases

U. Wegmüller, M. Santoro, C. Werner et al.

Analysis of Urban Areas Scattering with Simulated SAR Imagery

G. Margarit, J.J. Mallorquí, I. Corney et al.

Methodology and Techniques: DInSAR and PSI

Chairs: R. Hanssen & J. Mallorquí

Secretary: M. Lavallo

Coherent vs. Persistent Scatterers: A Case Study

L. Marotti, A. Parizzi, N. Adam & K.P. Papathanassiou

Repeat-Pass SAR Interferometry with Partially Coherent Targets

D. Perissin, A. Ferretti, R. Piantanida et al.

A 2+1D Phase Unwrapping for Advanced DInSAR Data Processing

M. Crosetto, O. Monserrat, P. Muniganti et al.

A Combined Multi-Temporal InSAR Method Incorporating Persistent Scatterer
and Small Baseline Approaches

A. Hooper

Optimal Data Generation for Multiple Images DInSAR Techniques: Minimum Cost Flow Interferograms and Region Growing Pixel Selection

P. Blanco-Sánchez, S. Duque, J.J. Mallorquí & D. Monells

Enhancements for Persistent Scatterer Interferometry with High Resolution SAR

S. Gernhardt, S. Hinz, N. Adam & R. Bamler

Applications: Earthquakes and Tectonics

Chairs: C. Lasserre & S. Jonsson

Secretary: S. Pinnock

Improvement of Source Model Parameter Estimations through the Use of Multiple Datasets and Full Data Autocovariance: An Application to the Kleifarvatn Earthquake, Iceland

H. Sudhaus, S. Jónsson & S. Knospe

Applications: Volcanoes

Chairs: P. Lundgren & G. Puglisi

Secretary: M. Lavalle

Study of the Deformation Field of Two Active Mexican Stratovolcanoes (Popocatepetl and Colima Volcano) by Time Series of InSAR Data

V. Pinel, A. Hooper, S. De la Cruz-Reyna et al.

Diverse Deformation Patterns of Aleutian Volcanoes from InSAR

Z. Lu, D. Dzurisin, C. Wicks Jr. & J. Power

Deformation at Taupo Volcano, New Zealand, Measured by InSAR, Lake Levelling and GPS

J.K. Hole, B.J. Scott, J. Beavan et al.

Fifteen Years of ERS and Envisat DInSAR Observations at Mt. Etna (Italy) by Using the SBAS Approach

F. Casu, G. Solaro, S. Pepe et al.

High Incidence Angles of ASAR Data Reveal New Insights for Studying the 2004-2005 Mt. Etna Eruption

G. Puglisi & F. Guglielmino

Deformation and Stress-Change Modeling at Sierra Negra Volcano, Galápagos, from Envisat InSAR and GPS Observations

S. Jónsson, W.W. Chadwick, M. Poland & D. Geist

Applications: Terrain Subsidence and Landslides

Chairs: P. Pasquali & T. Strozzi

Secretary: B. Kötz

Evolution of a Deep-Seated Rock Mass Movement Observed with Satellite SAR Interferometry

T. Strozzi, U. Wegmüller, E. Perruchoud et al.

Deformation of the Margin of Sudety Mountains (Southern Poland) Studied by Persistent Scatterers Interferometry

Z. Perski, R. Hanssen & P. Marinkovic

First Results of PS-InSAR Analysis of Crustal Deformation and Landslides in Galilee (Israel) and Presentation of the Joint German-Israeli Research Program to Improve Assessments of the Seismic Hazard Generated by the Dead Sea Transform Fault

C. Minet & N. Adam

Utilisation of InSAR for Subsidence Monitoring over the Caving Zone of Underground Metalliferous Mine

A. Jarosz, H. Zahiri, M. Warren & A. Sowter

Contrasting Ground Movements Revealed by Radar Interferometry over Abandoned Coal Mines (Campine, Belgium)

X. Devleeschouwer, P.-Y. Declercq, M. Duser & A. Debien

Monitoring of the Residual Mining Subsidence in the Nord/Pas-de-Calais Coalmine with DInSAR and PS Interferometry

Y. Guéguen, B. Deffontaines, M. Al Heib et al.

Ground Water Management and its Consequences in Delft, The Netherlands as Observed by Persistent Scatterer Interferometry

F. J. van Leijen & R.F. Hanssen

Subsidence Due to Peat Decomposition in The Netherlands, Kinematic Observations from Radar Interferometry

M. Caro Cuenca & R. Hanssen

Applications: PSI (Persistent Scatterer Interferometry) Validation

Chairs: P. Bally & M. Crosetto

Secretary: A. Minchella

PSIC-4: Validation and Inter-Comparison of Persistent Scatterers Interferometry: Main Results

D. Raucoules, B. Bourguine, M. De Michele et al.

Lessons Learned from PSIC4: Improving PSI Results for a Constrained Test Site
S. Samiei Esfahany, F.J. van Leijen, P. Marinkovic et al.

Validation of PSI Results of Alkmaar and Amsterdam within the TerraFirma
Validation Project
R.F. Hanssen, F.J. van Leijen, G.J. van Zwieten et al.

Persistent Scatterer Processing Validation in the Course of the TerraFirma Project
N. Adam, A. Parizzi, M. Eineder & M. Crosetto

Inter-Comparison of Persistent Scatterer Interferometry Results
M. Crosetto, M. Agudo, O. Monserrat & B. Pucci

InSAR Quality Control: Analysis of Five Years of Corner Reflector Time Series
P. Marinkovic, G. Ketelaar, F. van Leijen & R. Hanssen

The Establishment of the Nottinghamshire Corner Reflector Array (NCRA) for PSI Analysis
J.M. Leighton, A. Sowter, F.N. Teferle et al.

Persistent Scatterer InSAR Using Artificial Point Targets – First Analysis of
Amplitude and Phase Stability
F. Meyer, D. Atwood, W. Albright & G. Varga

Methodology and Techniques: Atmosphere

Chairs: R. Hanssen & F. Rocca
Secretary: O. Gråbak

New Insights into the Nature and Effects of the Water Vapour Field on InSAR
Measurements over Etna
R. Holley, G. Wadge & M. Zhu

Covariance Estimation, Geostatistical Prediction and Simulation for InSAR
Observations in Presence of Strong Atmospheric Anisotropy
S. Knospe & S. Jónsson

Comparison between SAR Atmospheric Phase Screens at 30' by Means of
ERS and Envisat Data
D. Perissin

Ionospheric Effects on SAR, InSAR, and SAR Polarimetry – Theory and
Experiences with ALOS PALSAR
F. Meyer & J. Nicoll

Interferometry and New SAR Missions: ALOS-PALSAR, TerraSAR-X, Radarsat-2, Cosmo Skymed

*Chairs: I. Hajnsek & E. Attema
Secretary: M. Thomas*

European Radar Observatory Sentinel-1
E. Attema, P. Snoeij & M. Davidson

First TerraSAR-X Interferometry Evaluation
N. Adam, M. Eineder, B. Schättler & N. Yague-Martinez

Interferometric and Polarimetric Interferometric Experiments with ALOS PALSAR Data
P. Pasquali

First TOPSAR Image Interferometry Results with TerraSAR-X
A. Meta, P. Prats, U. Steinbrecher et al.

Airborne and Ground-Based InSAR

*Chair: J. Mallorqui & A. Monti-Guarnieri
Secretary: M. Cruz*

The RAMSES Multi-Pass Interferometry Campaign in X-Band
H. Oriot, S. Angelliaume & X. Dupuis

Monitoring of Belvedere Glacier Using a Wide Angle GB-SAR Interferometer
L. Noferini, D. Mecatti, G. Macaluso et al.

DEM Generation Using Fixed Receiver Bistatic SAR Interferometric
S. Duque, P. López-Dekker, J.J. Mallorquí & J.C. Merlano

Applications: Other

*Chair: P. Pasquali/F.-M. Seifert
Secretary: M. Paganini*

Detection and Monitoring of Sand Dune Mobility in Southeast Niger Using
Multi-Temporal Coherence Images
C. Bodart, D. Derauw & A. Ozer

Poster Session 1

Coseismic and Postseismic Displacements from the Mozambique Earthquake of 22 February 2006 Detected by InSAR

M. Hashimoto, Y. Fukushima & T. Ozawa

InSAR Monitoring of Faial and Pico Islands (Azores), First Results

J. Martins, J. Catalão, P. Marinkovic & R. Hanssen

Monitoring the Campi Flegrei Caldera by Exploiting SAR and Geodetical Data: Recent Results and Future Applications

P. Berardino, S. Borgström, I. Aquino et al.

Multi Sensors InSAR Monitoring of Volcanic Activity: The February and April 2007 Eruptions at Piton de la Fournaise, Reunion Island, Imaged with Envisat-ASAR and ALOS-PALSAR Data

J.-L. Froger, Y. Fukushima, P. Tinard et al.

Integrated Satellite, GPS and Geophysical Data for Seismic Hazard Assessment in Vrancea Area, Romania

M. Zoran

Evolution of Post-Seismic Ground Deformation Observed by SAR Interferometry

M. Fomelis, Is. Parcharidis, N. Voulgaris & E. Lagios

Comparison of Models of PolInSAR Coherence for Forest Height Retrieval Using PolInSAR Simulated Data

M. Lavallo, D. Solimini, E. Pottier & Y.-L. Desnos

Models of Plant Motion Based on Field Observations or where has my Wheat Gone?

S. Hobbs

SAR Interferometry from Geo-Synchronous Orbit

S.E. Hobbs & D. Bruno

Experiments of Radio-Wave Velocity Tomography for DInSAR Applications at Mt. Etna Using GPS Data

G. Puglisi, M. Aranzulla & V. Bruno

Promoting the Use of Radar Data within the UK Academic Community

K. Kitmitto, G. Millin & J.-P. Muller

Extraction and Analysis of Coherent Targets Using Quad-Pol ALOS-PALSAR L-Band Data

C. Wang, M. Liao, Y. Wang et al.

Improved Image Alignment under the Influence of Elevation

M. Arikian, F. van Leijen, L. Guang & R. Hanssen

Numerical Error Analysis of CSL Georeferencing Processing Implementation

D. Derauw & A. Belmonte

How Accurately can we Locate a Persistent Scatterer in Three Dimensions?

A. Sowter, M. Warren & J. Leighton

Coherence Decomposition Analysis

T. Wang, D. Perissin, M. Liao & L. Lu

Poster Session 2

InSAR Observations of Deformation Associated with New Episodes of Volcanism at Kīlauea Volcano, Hawai`i, 2007

M.P. Poland

An Investigation on Atmospheric Effects in Airborne Interferometric SAR Data

A. Danklmayer & K.A.C. de Macedo

Comprehensive Study of Gravity Waves' Influences on InSAR Product and Approach to Remove the Effect

S. Adham Khiabani, M. Dehghani, M.J. Valadan Zouj & M.R. Mobasheri

Effect of Atmosphere in InSAR over Kuwait Desert

H.K. Al Jassar & K.S. Rao

Monitoring Subsidence with Short-Term InSAR Image Stack

M. Liao, L. Lu, C. Wang et al.

Retrieval of Ground Subsidence by Integrating GPS Observations and Persistent Scatterer INSAR and Using a Small Number of ASAR Images

Q. Chen, X. Ding, L. Yuan, G. Liu et al.

Surface Deformations in Southern-Italy Areas of Campania Region by ERS-SAR Observations

P. Ballatore

Measurement of Land Subsidence in the Kashmar Valley, Northeast Iran, Using Satellite Radar Interferometry

J. Anderssohn, H.-U. Wetzel, T. Walter & M. Motagh

Satellite Interferometry Reveals Spatial Patterns of Subsidence in the Ancient Wieliczka Salt Mine (UNESCO Heritage Site, Poland)

J. Wasowski, F. Bovenga, R. Nutricato et al.

Continuous Risk Assessment of Structures in Areas of Ground Deformation Susceptibility by Persistent Scatterers InSAR: Preliminary Results of the Rio-Antirio Bridge (Greece)

I. Parcharidis, M. Fomelis, P. Kourkouli et al.

Application of the Differential Interferometric Technique (DInSAR) to Unravel the Present Day Vertical Movement in the Glueckstadt Graben, Germany
C. M. Paleari, B. Crippa, A. M. Marotta & U. Bayer

Neyshabour Subsidence Monitoring Using Interferometric SAR
M. Dehghani, M.J. Valadan Zouj, S. Saatchi & I. Entezam

Landslide-Like Development of Rockglaciers Detected with ERS-1/2 SAR Interferometry
R. Delaloye, T. Strozzi, C. Lambiel et al.

SBAS-DInSAR Surface Deformation Analysis of the Mendoza Region (Argentina) by Using Envisat ASAR Data
L.D. Euillades, M.H. Blanco, A. Pepe & P.A. Euillades

An X-Band Airborne DInSAR Experiment with the OrbiSAR System
S. Perna, C. Wimmer, J. Moreira & G. Fornaro

Summaries and Recommendations

Methodology and Techniques: General

Methodology and Techniques: DinSAR/PSI

Methodology and Techniques: Atmosphere

Applications: Earthquakes and Tectonics

Applications: Volcanoes

Applications: Terrain Subsidence and Landslides

Applications: PSI Validation

Airborne and Ground-Based InSAR

Interferometry and New SAR Missions

List of Participants
