

# CONTENTS

## Foreword & Speech

*F. Hass*

## Opening and Keynote Speech

### Invited Presentation

The Spanish Space Programme in the European Context

*J. Lopez Reig*

## Session 1A: Optical Fiber & Spacewire Strategy

*Chairperson: O. Notebaert*

Optical Payload Interface Unit for Telecommand and Telemetry of Satellite Payload Equipment

*B. Hespeler & R. Kurz*

SpaceWire: A Long Haul Strategy for ESA

*P. Armbruster & M. Süss*

## Session 1B: Fault Analysis, Dependability & Safety

*Chairperson: K. Hjortnaes*

Dependability and Safety Issues for Aerospace Software: A Systematic Approach

*A. Vozella, G. D'Anna, G. Gigante et al.*

FDIR Strategy Validation with the B Method  
*D. Sabatier, B. Dellandrea & D. Chemouil*

## **Session 2A: Spacewire Networks**

*Chairperson: P. Armbruster*

TopNet Pilot Operation Implementation: A first Step to Virtual Satellite Integration  
*C. Honvault & R. Vitulli*

Remote Integration of SpaceWire Units Using Topnet Technology  
*S. Dethève, G. Estaves, L. Esposti et al.*

Evaluating the Benefits of Virtual Satellite Integration with SpaceWire  
*S. Mills, S. Parkes & R. Vitulli*

## **Session 2B: Security**

*Chairperson: B. Mullet*

The Operations Security Concept for Future ESA Earth Observation Missions  
*D. Fischer, P. Bargellini & M. Merri*

Processes and Concepts Toward Secure Communications for ESA Missions  
*G. Herrgott, J. Russell, I. Aguilar Sanchez & O. Notebaert*

## **Session 3A: Spacewire Facilities and Implementation Issues**

*Chairperson: O. Notebaert*

SpaceWire Remote Terminal Controller  
*J. Iltad, W. Gasti, S. Habinc et al.*

SpaceWire Remote Terminal Controller (RTC) Development Suite  
*S. Habinc*

SpaceWire on FPGA – Challenges and Solutions  
*B.M. Cook & C.P.H. Walker*

## **Session 3B: Modelling Towards Code**

*Chairperson: G. Macchia*

Guidelines for Modelling the ARINC 653 Software Architecture

*R. López, N. Casas, J. Fornis et al.*

AADL Modes for Space Software

*J.-F. Rolland, M. Filali, J.P. Bodeveix et al.*

Offline Interoperability, Cost Reduction and Reliability for Operational Procedures Using Meta-Modeling Technology

*E. Poupart, C. Percebois, C. Palanque et al.*

SysML: A Language for Space System Engineering

*S. Mazzini & A. Stragapede*

## **Session 4A: Radiation Protection**

*Chairperson: G. Moury*

Radiation Hard 0.25 Micron CMOS Library at IHP

*U. Jagdhold*

## **Session 4B: Design towards Code and Pus**

*Chairperson: C. Jørgensen*

PUS Services Software Building Block Automatic Generation for Space Missions

*S. Candia, F. Sgaramella & G. Mele*

Should PUS Standard Evolve?

*Ph. Fourtier, J. Nodet & G. Garcia*

## **Session 5A: ASICS**

*Chairperson: H.V. Heyer*

The COLE System-on-Chip and its Software Development Environment

*T. Hult, P. Sandin, A. Rynäs & A. Karlsson*

ReSP: A Design and Validation Tool for Data Systems

*G. Beltrame & L. Fossati*

## **Session 5B: On-Board Architecture & Communication Standards Including RASTA**

*Chairperson: P. Lacan*

ESA Communication Standards: Status, Evolution and Prototyping Activities  
*C. Taylor*

ESA's Spacecraft Avionics Development Platform – RASTA  
*S. Habinc, J. Gaisler, C. Monteleone & C. Taylor*

## **Session 6A: On-Board Memory**

*Chairperson: P. Beerthuizen*

NAND-Flash Memory Technology in Mass Memory Systems for Space Applications  
*M. Cassel, M. Staehle, P. Roos et al.*

Advanced Mass Memory Concept Development  
*A.V. Sanchez, G. Furano, N.G. Tejedor et al.*

## **Session 6B: Auto Generation of Code and Verification**

*Chairperson: R. Szczepaniak*

Automated Verification of Code Generated from Models: Comparing Specifications with Observations  
*R. Gerlich, D. Sigg & R. Gerlich*

Gene-Auto: Automatic Software Code Generation for Real-Time Embedded Systems  
*A.-E. Rugina, D. Thomas, X. Olive & G. Veran*

Integrated Development, Verification and Validation Approach for Space Systems Using Autocoding Techniques  
*V. Barrena-Perez, P. Colmenarejo-Matellano, D. Modrego-Contreras et al.*

## **Session 7A: Spacecraft Communication Systems**

*Chairperson: P. Armbruster*

High Throughput Bent-Pipe Processor Demonstrator  
*P. Tabacco, A. Vernucci, L. Russo et al.*

The Italian Optical Telecommunications Payload: Breadboard Results  
*L. Bonino, M. Caramia, V. Catalano et al.*

## **Session 7B: On-Board Architecture Standards: SOIS**

*Chairperson: R. Gerlich*

CCSDS SOIS Subnetwork Services: A First Reference Implementation  
*S. Gunes-Lasnet, O. Notebaert, P.-Y. Farges & S. Fowell*

ECSS and SOIS Standard Services for Communications over a 1553B Bus  
*O. Notebaert, S. Gunes-Lasnet & P.-Y. Farges*

The SOIS Plug-and-Play Architecture and its Proposed Mapping onto SpaceWire  
*S.D. Fowell & C. Taylor*

## **Session 8A: LEON-Based Processors and Systems**

*Chairperson: P. Lacan*

Development of Real-Time AOCS Application on LEON Environment - Multi-Head Attitude Determination System  
*M. Caramia, A. Bacchetta*

LEONDARE – SPARC V8 Processor with High-Speed FPU and MMU  
*P. Somerlinck, S. Habinc, J. Gaisler et al.*

Hardware Accelerated LEON2-FT Simulator (TSIM-HW)  
*S. Habinc, J. Gaisler & C. Monteleone*

## **Session 8B: On-Board Architecture Standards & S/W Tools: ASSERT/DISCO/CORDET/SPACIFY/TOPCASED**

*Chairperson: R. Ward*

The ASSERT Virtual Machine Kernel: Support for Preservation of Temporal Properties  
*J. Zamorano, J.A. de la Puente, J.A. Pulido & S. Urueña*

A Component-Oriented Framework for Spacecraft On-Board Software  
*M. Prochazka, R. Ward, P. Tuma et al.*

The SPaCIFY Project  
*D. Chemouil*

## **Session 9A: RTOS incl. RTEMS Based Systems**

*Chairperson: M. Richard-Foy*

RTEMS CENTRE- Support and Maintenance CENTRE to RTEMS Operating System

*H. Silva, A. Constantino, M. Zulianello et al.*

xLuna – Demonstrator on ESA Mars Rover

*P. Braga, L. Henriques, B. Carvalho et al.*

AMOB – ARINC 653 Simulator for Modular Based Space Applications

*E. Pascoal, J. Rufino, T. Schoofs & J. Windsor*

## **Session 9B: Testing, Verifying and Qualifying**

*Chairperson: K. Hjortnaes*

Test Analysis Tools to Ensure Higher Quality of On-Board Real Time Software for Space Applications

*O. Boudillet, J.C. Mescam & D. Dalemagne*

GOCE Platform OBSW ISVV Test Campaign – Blending Demanding Standards with Agility

*J. Quirce Garcia*

Building the Qualification File of EGNOS with DOORS

*J. Fabre*

## **Session 10A: Payload Processing Systems**

*Chairperson: G. Moury*

The New Payload Handling System for the German On-Orbit Verification Satellite TET with the Sensor Bus as Example for Payloads

*H.-V. Heyer, M. Turk, M. Schlicker et al.*

## **Session 10B: File System Integration & File Transfers**

*Chairperson: G. Macchia*

Use of On-Board File System: A Real Simplification for the Operators?

*X. Olive, G. Garcia, B. Alison & M.C. Charneau*

CCSDS File Delivery Protocol for Future ESA Missions

*L. Demonceau, P. Parisi, M. Ciccone et al.*

## **Session 11A: Galileo**

*Chairperson: F. Hass*

GALILEO Signal In Space Triple Carrier four Space Vehicle Simulator

*P. Tabacco, A. Vernucci, C. Cornacchini et al.*

AIV Platform for the Galileo Precise Timing Facility

*B.A. Oving & E. Kroon*

Galileo “Message Generation Facility” – Safety-Critical and Real-Time

*A. Latorre, A. Mora, P. Palomo et al.*

## **Session 11B: Simulators for Testing & Verification of Spacecraft Systems, Components and Operations**

*Chairperson: C. Adourian*

Validation and Training at the Erasmus-USOC Using Payload Simulators

*F. Cornelissen & P. Wormgoor*

Long Range Validation of ATV-ISS Rendez-Vous and Docking Using EPOSx

*E. Schreutelkamp*

Views and Trends in Simulator Design

*P. Beerthuizen, R. de Vries & C. Plevier*

## **Session 12A: Avionics and Video Systems**

*Chairperson: C. Dionisio*

EXOMARS Composite Avionics Description and its Validation on the Test Benches

*M. Montagna, M. Capuano & C. Cassi*

Flight Software Missionization Tool for Ariane 5

*A. Bouchet & E. Cañamares de Juan*

## **Session 12B: Simulation for Ground System Testing & Verification**

*Chairperson: M. Fauveau*

MAX – A Simulator of the Ground Station Equipment Monitoring and Control Based on SIMSAT and SMP2 Compliant Models

*C. Lannes*

Developing Operational Spacecraft Simulators  
*M. Sarkarati, M. Spada, D. Verrier & M. Jones*

### **Session 13A: Autonomy and Reconfiguration**

*Chairperson: R. Ward*

Advanced System-on-Chip Design with In-Flight Reconfigurable Processing  
Cores for Space Applications  
*B. Osterloh, H. Michalik, B. Fiethe & K. Kotarowski*

### **Session 13B: Ground Segment Operations Planning & Execution**

*Chairperson: H. Pasquier*

COMU: Multi Mission Tool and Interoperability  
*M. Benhamou & P. Mougnaud*

Mission Automation and Mission Planning and how to Combine them  
*C. Schurig, J. Morales & V. Reggestad*

An Integrated Solution to Satellite Control Center Operational Issues  
*M. Betti*

### **Session 14A: Robotics and Autonomy**

*Chairperson: A. Martelli*

CREST Autonomous Robotic Scientist: Developing a Closed-Loop Science Exploration  
Capability for European Mars Missions  
*M. Woods, A. Shaw, R. Ward et al*

Eurobot Underwater Model Control System Overview & Tests Results  
*A. Merlo, G. Battistoni, E. Pensavalle & F. Didot*

### **Session 14B: Ground Segment Architectures and Generic Methods**

*Chairperson: B. Mullet*

Full Java Implementation of Generic GIS Functionalities for Pleiades G/S  
*J.-C. Lallemant & G. Boutonnet*

OCTAVE: A Data Model-Driven Monitoring and Control System in Accordance with Emerging CCSDS Standards such as XTCE and SM&C Architecture  
*E. Cortiade, P.-A. Cros, E. Poupart & D. Fournier,*

**Panel Session: CORDET/DOMENG:  
The Future ESA OBSW Generic Architecture**  
*Chairpersons: T. Vardanega & P. Rodriguez-Dapena*

Modelling the Space Domain: Domain Engineering for Avionics/Embedded Systems  
*A.-I. Rodríguez, P. Rodríguez, I.-L. Vera & E. Alaña*

Component Oriented Development Techniques: Assessing a Domain Engineering Approach to Space Software Engineering  
*L. Planche*

CORDETS (Component Oriented Development Techniques) and DOMENG (Domain Engineering)  
*P. Rodríguez-Dapena*

**List of Participants**

**Abstract Book**
